National foreword

This British Standard is the English language version of EN 10271:1998.

The UK participation in its preparation was entrusted by Technical Committee ISE/10, Flat rolled steel products, to Subcommittee ISE/10/8, Coated steel flat rolled products, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 12, an inside back cover and a back cover.

Amendments issued since publication

Amd. No.	Date	Text affected

This British Standard, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 March 1999

Descriptors: Steel products, metal plates, cold rolled products, coated metal, galvanizing, nickel coatings, electrodeposited coatings, designation, chemical composition, grades: quality, mechanical properties, surface treatment, inspection, tests, marking

English version

Electrolytically zinc-nickel (ZN) coated steel flat products — Technical delivery conditions

Produits plats en acier, revêtus de zinc-nickel (ZN)
par voie électrolytique — Conditions techniques de
livraison

Flacherzeugnisse aus Stahl mit elektrolytisch
abgeschiedenen Zink-Nickel(ZN)-Überzügen —
Technische Lieferbedingungen

This European Standard was approved by CEN on 5 November 1998.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee ECISS/TC 27, Surface coated flat products — Qualities, dimensions, tolerances and specific tests, the Secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 1999, and conflicting national standards shall be withdrawn at the latest by May 1999.

ECISS/TC 27 met on 1996-11-26 in Düsseldorf and agreed on the text for submission of this draft European Standard to Formal Vote. The following countries were represented in that meeting: Austria, Belgium, France, Germany, Netherlands and United Kingdom.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

1 Scope

1.1 This European Standard specifies requirements for continuously electrolytic zinc-nickel coated cold rolled flat products of low carbon steels suitable for cold forming according to Table 1 and Table 2 in rolled widths ≥ 600 mm and thicknesses from 0.35 mm up to and including 3 mm, delivered as strip (in coil form), sheet, slit strip or cut lengths obtained from slit strip or sheet. The coating is composed of Zn with a Ni-content of 10.5 % to 13 %.

1.2 This European Standard may also be applied to the coating requirements of continuously electrolytic zinc-nickel coated cold rolled flat products of:

- a) steels according to EN 10139 (cold rolled strip in rolled widths < 600 mm);
- b) other types of low carbon steel for cold forming;
- c) steels normally characterized by minimum yield strength values in addition to formability parameters, e.g.:
 - steels with high yield strength and improved formability according to EN 10268 or other microalloyed steels;
 - rephosphorized steels and bake-hardening steels;
 - general purpose structural steels.

1.3 By special agreement at the time of ordering this European Standard may be applied to the coating requirements of continuously electrolytic zinc-nickel coated hot-rolled steel flat products (e.g. according to EN 10025, EN 10111, EN 10149-1 to EN 10149-3 etc.).

1.4 The coating masses, surface qualities and surface finishes are given in 5.9, 5.11 and Table 3. As the mass of the zinc-nickel coating applied is relatively small, the material is not intended to withstand outside exposure without further chemical treatment and painting.

1.5 This European Standard is not applicable to

- hot-dip zinc coated steel strip and sheet (see EN 10142 and EN 10147);
- electrolytically zinc coated cold rolled flat products (see EN 10152);
- continuously hot-dip aluminium-silicon (AS) coated steel strip and sheet (see EN 10154);
- continuously organic coated steel flat products (see EN 10169);
- continuously hot-dip zinc-aluminium (ZA) coated steel strip and sheet (see EN 10214);
- continuously hot-dip aluminium-zinc (AZ) coated steel strip and sheet (see EN 10215).

2 Normative references

This European Standard incorporates by dated or undated reference provisions from other publications. These normative reference are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this draft European Standard only when incorporated in it by amendment or revision. For undated references, the latest edition of the publication referred to applies.
