National foreword

This British Standard has been prepared by Technical Committee EPL/39 and is the English language version of EN 111101:1991 *Blank detail specification: Display storage tubes,* published by the Electronic Components Committee (CECC) of the European Committee for Electrotechnical Standardization (CENELEC).

In 1991 the CENELEC Electronic Components Committee (CECC) accepted CECC 11101:1984 as European Standard designated EN 111101:1991. This amendment implements EN 111101:1991 as a British Standard.

This standard lists the ratings, characteristics and inspection requirements which have to be included as mandatory requirements in any detail specification for this type of display storage tube.

Detail specifications should conform to the requirements of this blank detail specification and BS CECC 00111 Rule of Procedure 11. *Specifications* Part 4:1991 *Regulations for CECC detail specifications.*

This British Standard which implements the CECC Rules of Procedure is BS 9000 *General requirements for a system for electronic components of assessed quality* Part 2:1996 *Specification for the national implementation of the CECC system.*

Copyright

BSI copyright (see back cover) does not preclude the reproduction and free use of the pro forma pages in the course of preparing detail specifications.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 12 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

EN 111101

December 1991

Descriptors: Quality, electronic components, tubes

English version

Blank Detail Specification: Display storage tubes

Spécification Particulière Cadre:
Tubes de visualisation à mémoire

Vordruck für Bauartspezifikation:
*Eine deutsche Version liegt zur Zeit nicht vor**

This European Standard was approved by the CENELEC Electronic Components Committee (CECC) on 20 November 1991. The text of this standard consists of the text of CECC 11101 Issue 1 1984 of the corresponding CECC Specification. CENELEC members are bound to comply with CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the General Secretariat of the CECC or to any CENELEC member.

This European Standard exists in three official versions (English, French, German*). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CECC General Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom. The membership of the CECC is identical, with the exception of the national electrotechnical committees of Greece, Iceland and Luxembourg.

Foreword

The CENELEC Electronic Components Committee (CECC) is composed of those member countries of the European Committee for Electrotechnical Standardization (CENELEC) who wish to take part in a harmonized System for electronic components of assessed quality.

The object of the System is to facilitate international trade by the harmonization of the specifications and quality assessment procedures for electronic components, and by the grant of an internationally recognized Mark, or Certificate, of Conformity. The components produced under the System are thereby accepted by all member countries without further testing.

This specification has been formally approved by the CECC, and has been prepared for those countries taking part in the System who wish to issue national harmonized specifications for DISPLAY STORAGE TUBES. It should be read in conjunction with document CECC 00100: *Basic Rules* (1974).

At the date of printing of this document the member countries of the CECC are Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Preface

This blank detail specification was prepared by CECC Working Group 11: "Electro-optical devices".

It is a blank detail specification for display storage tubes relating to the sectional specification CECC 11100 and the generic specification CECC 11000.

The text of this specification was circulated to the CECC for voting in the document indicated below and was ratified by the President of the CECC for printing as a CECC Specification:

Document	Voting Date	Report on the Voting
CECC (Secretariat) 1080	December 1982	CECC (Secretariat) 1273

It is recognized that the layout proposed cannot be applied to all detail specifications based on this document.

The CECC Management Committee at its meeting in Copenhagen in March 1979 decided that as the German National Authorized Institution would not be implementing the requirements of this CECC blank detail specification, the text should be published in the English and French versions only.
