National foreword

This British Standard is the English language version of EN 12021:1998.

Clause 6.2.1 of this European Standard requires that, “in any event all contaminants shall be kept to as low a level as possible and shall be below the national exposure limit”. National Occupational Exposure Limits (OEL) for substances hazardous to health are published yearly by the Health and Safety Executive and can be found in Guidance Note, *Occupational exposure limits* (EH40). In the context of this European Standard “below the national limit” will mean that the concentration level should not be greater than 10 % of the relevant time (8 h) weighted average OEL.

The UK participation in its preparation was entrusted by Technical Committee PH/4, Respiratory protection, to Subcommittee PH/4/1, Selection and terminology, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Health and Environment Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 April 1999
