## Sports mats

Part 2: Pole vault and high jump mats,  
safety requirements

## National foreword

This British Standard is the UK implementation of EN 12503-2:2016. It supersedes BS EN 12503-2:2001 which is withdrawn.

BSI, as a member of CEN, is obliged to publish EN 12503-2 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

The UK committee did not agree with the removal of Annex A (informative) Flame retardancy. In the UK, there is an expectation that sports matting will meet certain minimum levels of flame retardancy. BS 1892-3:2003 details these levels and the required test methodology.

The UK participation in its preparation was entrusted by Technical Committee SW/136, Sports, playground and other recreational equipment, to Subcommittee SW/136/22, Sports, playground and other recreational equipment – gymnasium and playing field equipment.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
