National foreword

This British Standard is the English language version of EN 1253-1:1999.

The UK participation in its preparation was entrusted by Technical Committee B/505, Wastewater engineering, to Subcommittee B/505/11, Waste fittings for sanitary appliances, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 9 and a back cover.

The BSI copyright notice displayed in this document indicates when this document was last issued.

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 September 1999

This European Standard was approved by CEN on 3 May 1998.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat: rue de Stassart 36, B-1050 Brussels

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 165, Waste water engineering, the Secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text, or by endorsement, at the latest by October 1999, and conflicting national standards shall be withdrawn at the latest by October 1999.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom

Contents

	Page
Foreword	2
1 Scope	3
2 Normative references	3
3 Definitions	3
4 Loading strength	5
5 Places of installation	5
5.1 General	5
5.2 Exceptions	6
6 Nominal sizes	6
7 Materials	6
8 Design and construction	6
8.1 General	6
8.2 Appearance	6
8.3 Depth of water seal	6
8.4 Resistance of water seal to pressure	6
8.5 Apertures in gratings	6
8.6 Blockage prevention: trapped gullies	7
8.6.1 Access for cleaning	7
8.6.2 Self-cleansing capacity	7
8.6.3 Anti-blockage	7
8.7 Side inlets	7
8.8 Thermal behaviour	7
8.8.1 Temperature cycling for floor gullies	7
8.8.2 Additional mounting conditions and test conditions for gullies for use with sheet floor covering	7
8.8.3 Roof outlets	7
8.8.4 Behaviour when exposed to hot bitumen or asphalt	7
8.9 Tightness	7
8.9.1 Odourtightness: trapped gullies	7
8.9.2 Watertightness for gully bodies	7
8.9.3 Gullies for use with a membrane	7
8.9.4 Gullies for use with a sheet floor covering	8
8.9.5 Gullies with factory affixed skirt membrane	8
8.9.6 Watertightness for extensions	8
8.10 Mechanical strength	8
8.10.1 Extensions for gullies for use with sheet floor covering	8
8.10.2 Membrane clamping ring	8
8.10.3 Gullies with factory affixed skirt membrane	8
8.11 Flow rates	8
8.11.1 Water through the grating	8
8.11.2 Water through the grating and side inlets	8
8.11.3 Water through the side inlet	8
8.12 Roof outlets for siphonic drainage systems	8
8.12.1 Fitness for the purpose	8
8.12.2 Coefficient of hydraulic loss	8
9 Marking	8
