

Pigments for the colouring of building materials based on cement and/or lime — Specifications and methods of test

The European Standard EN 12878:1999 has the status of a
British Standard

ICS 87.060.10; 91.100.10

National foreword

This British Standard is the English language version of EN 12878:1999. It supersedes BS 1014:1975 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee STI/1, Pigments, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 13 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 November 1999

This European Standard was approved by CEN on 13 May 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 298 “Pigments and extenders”, the Secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 1999, and conflicting national standards shall be withdrawn at the latest by December 1999.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Annex A and Annex B are informative.

Contents

	Page
Foreword	2
1 Scope	3
2 Normative references	3
3 Definitions	3
4 Requirements	4
4.1 Composition of the pigments	4
4.2 Sampling	4
4.3 Testing of single pigments	5
4.4 Quality control	5
4.5 Additional requirements	5
5 Determination of the effects of pigments on cement and/or lime based materials	6
5.1 General remarks	6
5.2 Determination of the influence on the setting characteristics of cement	6
5.3 Determination of the influence on the compressive strength of cement mortar	6
6 Determination of water-soluble content	8
6.1 Total content	8
6.2 Water-soluble halides and other anions precipitated by Ag ⁺	8
7 Total chlorine content	8
8 Determination of relative colour strength	8
8.1 General remarks	8
8.2 Determination of relative colour strength in barytes or white Portland cement CEM I (dry mix)	8

	Page
8.3 Determination of relative colour strength in barytes (wet mix)	9
8.4 Determination of relative colour strength in white Portland cement mortar (wet mix)	10
9 Determination of alkali stability of a pigment	11
9.1 General remarks	11
9.2 Preparation of test pieces	11
9.3 Test procedure	11
10 Evaluation of resistance to weathering of pigments in building materials	11
11 Evaluation of heat stability	12
12 Specific test report	12
Annex A (informative) Explanations	13
Annex B (informative) International Standards on particular pigments	13
Table 1 — Requirements for the initial and biennial test on single pigments for the colouring of non-structural unreinforced building materials based on cement and/or lime	5
Table 2 — Requirements for the initial and biennial test on single pigments for the colouring of structural steel reinforced concrete	6
Table 3 — Requirements for pigments as delivered for the colouring of non-structural unreinforced building materials based on cement and/or lime	7
Table 4 — Requirements for pigments as delivered for the colouring of structural steel reinforced concrete	7
Table 5 — Additional requirements for pigments for the colouring of building materials based on cement and/or lime — to be agreed between the interested parties	7
