

General requirements for components used in pneumatically pressurized discharge pipes, drains and sewers

The European Standard EN 1293:1999 has the status of a
British Standard

ICS 23.040.01; 91.140.80; 93.030

National foreword

This British Standard is the English language version of EN 1293:1999.

The UK participation in its preparation was entrusted by Technical Committee B/505, Waste water engineering, to Subcommittee B/505/1, General requirements for pipes and fittings, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 9 and a back cover.

The BSI copyright notice displayed throughout this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 August 1999

English version

General requirements for components used in pneumatically pressurized discharge pipes, drains and sewers

Prescriptions générales pour les composants utilisés
dans les réseaux d'évacuation, de branchement et
d'assainissement sous pression pneumatique

Allgemeine Anforderungen an Bauteile von
pneumatisch betriebebenen Abwasserdruckleitungen

This European Standard was approved by CEN on 16 December 1998.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 165, Waste water engineering, the Secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 1999, and conflicting national standards shall be withdrawn at the latest by October 1999.

This European Standard has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

This European Standard provides the basis for the preparation or revision of product standards for discharge pipes, drains and sewers operating as pneumatically pressurized systems (see clause 1 “Scope”)

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Contents

	Page
Foreword	2
1 Scope	3
2 Normative references	3
3 Definitions, symbols and abbreviations	3
4 Functional and dimensional requirements	4
4.1 Dimensions of pipes and fittings	4
4.1.1 Nominal sizes	4
4.1.2 Internal diameters and limit deviations	4
4.2 Geometry of pipes	4
4.3 Geometry of fittings	5
4.3.1 General	5
4.3.2 Bends	5
4.3.3 Branches	5
4.4 Smoothness of bore	5
4.5 Appearance and soundness	5
4.6 Longitudinal bending moment resistance	5
4.7 Interconnection	5

4.8 Corrosion resistance	5
4.9 Abrasion resistance	5
4.10 Modification	5
4.11 Coatings and linings	5
4.12 Long-term behaviour	5
4.13 Durability	5
4.14 Sealing elements	5
4.15 Mechanical strength	6
4.16 Pressure classes for pipes, fittings and joints	6
4.17 Airtightness and watertightness	6
4.17.1 Seals for joints	6
4.17.2 Rigid joints	6
4.17.3 Adjustable joints	6
4.17.4 Flexible joints	6
4.18 Restrained joints	6
4.19 Temperature	6
4.20 Dimensional stability	7
5 Test methods	7
5.1 Measurement of diameters and wall thicknesses	7
5.1.1 Mean internal diameter of barrels	7
5.1.2 Mean external diameter of barrels	7
5.1.3 Wall thickness of barrels	7
5.2 Measurement of deviation from straightness of barrels	7
5.3 Measurement of deviation from squareness of the ends of the pipes	7
5.4 Longitudinal bending moment resistance test for pipes	7
5.5 Crushing test for pipes with rigid behaviour	7
5.6 Stiffness test for pipes with flexible behaviour	8
5.7 Pressure tests	8
5.7.1 Tests for pipes	8
5.7.2 Test for joints	8
5.7.3 Test for restrained joints	8
5.8 Tests for fittings	8
6 Quality control	8
7 Marking	8
Annex A (informative) Examples for principles of pneumatically pressurized waste water systems	9
