- Scope has been updated;
- Normative references have been updated;
- Clause 3 has been improved with new definitions;
- The proportion of foreign matter has been increased from 0,5 % to 2 % (it was necessary because more and more recycled fillings would be coming onto the market in future, which would automatically contain a higher proportion of foreign matter);

- Table 1 has been modified;
- Clause 6 has been modified (text has been added and Table 2 has been modified);
- Table 4 has been modified;

- Bibliography has been updated.
