

Specification for

**Harmonized system of  
quality assessment for  
electronic  
components —  
Blank detail  
specification —  
C.W. magnetrons for RF  
heating or cooking  
applications**

The European Standard EN 136002:1992 has the status of a  
British Standard

# Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee EPL/39, Electronic tubes, upon which the following bodies were represented:

- FEI (Federation of the Electronics Industry)
- National Supervising Inspectorate (BSI PC)

# National foreword

This British Standard has been prepared by Technical Committee EPL/39 and is the English language version of EN 136002:1992 *Blank detail specification: C.W. magnetrons for RF heating or cooking applications*, published by the Electronic Components Committee (CECC) of the European Committee for Electrotechnical Standardization (CENELEC).

In 1992 the CENELEC Electronic Components Committee (CECC) accepted CECC 36002:1979 as European Standard designated EN 136002:1992. Amendment No. 1 implements EN 136002:1992 as a British Standard.

This standard lists the ratings, characteristics and inspection requirements which have to be included as mandatory requirements in any detail specification for this type of magnetron.

Detail specifications should conform to the requirements of this blank detail specification and BS CECC 00111 Rule of Procedure 11. *Specifications — Part 4:1991 Regulations for CECC detail specifications.*

This British Standard which implements the CECC Rules of Procedure is BS 9000 *General requirements for a system for electronic components of assessed quality — Part 2:1996 Specification for the national implementation of the CECC system.*
