

Explosives for civil uses — High explosives —

Part 3: Determination of sensitiveness to friction of explosives

The European Standard EN 13631-3:2004 has the status of a
British Standard

ICS 71.100.30

National foreword

This British Standard is the official English language version of EN 13631-3:2004.

The UK participation in its preparation was entrusted to Technical Committee CII/61, Explosives for civil uses, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, was published under the authority of the Standards Policy and Strategy Committee on 25 August 2004

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 12, an inside back cover and a back cover.

English version

Explosives for civil uses - High explosives - Part 3: Determination of sensitiveness to friction of explosives

Explosifs à usage civil - Explosifs - Partie 3 : Détermination
de la sensibilité au frottement des explosifs

Explosivstoffe für zivile Zwecke - Sprengstoffe - Teil 3:
Bestimmung der Reibempfindlichkeit von Explosivstoffen

This European Standard was approved by CEN on 21 June 2004.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 13631-3:2004) has been prepared by Technical Committee CEN/TC 321 "Explosives for civil uses", the secretariat of which is held by AENOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2005, and conflicting national standards shall be withdrawn at the latest by February 2005.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

This document is one of a series of standards on *Explosives for civil uses - High explosives*. The other parts of this series are:

prEN 13631-1	Part 1: Requirements
EN 13631-2	Part 2: Determination of thermal stability of explosives
EN 13631-4	Part 4: Determination of sensitiveness to impact of explosives
EN 13631-5	Part 5: Determination of resistance to water
EN 13631-6	Part 6: Determination of resistance to hydrostatic pressure
EN 13631-7	Part 7: Determination of safety and reliability at extreme temperatures
EN 13631-10	Part 10: Verification of the means of initiation
EN 13631-11	Part 11: Determination of transmission of detonation
prEN 13631-12	Part 12: Specification of boosters with different initiating capability
EN 13631-13	Part 13: Determination of density
EN 13631-14	Part 14: Determination of velocity of detonation
prEN 13631-15	Part 15: Calculation of thermodynamic properties
EN 13631-16	Part 16: Detection and measurement of toxic gases

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
