

Natural stone test methods — Determination of the slip resistance by means of the pendulum tester

The European Standard EN 14231:2003 has the status of a
British Standard

ICS 73.020; 91.100.15

National foreword

This British Standard is the official English language version of EN 14231:2003.

The UK participation in its preparation was entrusted to Technical Committee B/545, Natural stone, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 24 April 2003

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 13 and a back cover.

The BSI copyright date displayed in this document indicates when the document was last issued.

English version

Natural stone test methods - Determination of the slip resistance by means of the pendulum tester

Méthodes d'essai pour les pierres naturelles -
Détermination de la résistance à la glissance au moyen du
pendule de frottement

Prüfverfahren für Naturstein - Bestimmung des
Gleitwiderstandes mit Hilfe des Pendelprüfgerätes

This European Standard was approved by CEN on 26 May 2002.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword	3
1 Scope.....	5
2 Normative references	5
3 Principle	5
4 Terms and definitions	5
5 Apparatus.....	6
6 Materials.....	9
7 Preparation of the specimens.....	9
7.1 Sampling	9
7.2 Dimensions of the test specimens	9
8 Test procedure	10
8.1 General.....	10
8.2 Test procedure (in dry conditions).....	10
8.3 Test procedure (in wet conditions)	10
9 Expression of results.....	11
10 Test report.....	11
Annex A (normative) Calibration of the pendulum friction tester.....	13
A.1 Weighing of components	13
A.2 Balancing of the pendulum arm assembly.....	13
A.3 Setting the effective spring tension	13
A.4 Setting the pointer stop	13

Foreword

This document (EN 14231:2003) has been prepared by Technical Committee CEN/TC 246, "Natural stones", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2003, and conflicting national standards shall be withdrawn at the latest by October 2003.

This draft standard is one of the series of draft standards for tests on natural stone.

Test methods for natural stone consist of the following:

EN 1925, *Natural stone test methods - Determination of water absorption coefficient by capillarity*

EN 1926, *Natural stone test methods - Determination of compressive strength*

EN 1936, *Natural stone test methods - Determination of real density and apparent density and of total and open porosity*

EN 12370, *Natural stone test methods - Determination of resistance to crystallisation (by total immersion)*

EN 12371, *Natural stone test methods - Determination of frost resistance*

EN 12372, *Natural stone test methods - Determination of flexural strength under concentrated load*

EN 12407, *Natural stone test methods - Petrographic description*

EN 13161, *Natural stone test methods - Determination of flexural strength under constant moment*

EN 13364, *Natural stone test methods - Determination of the breaking load at dowel hole*

EN 13755, *Natural stone test methods - Determination of water absorption at atmospheric pressure*

EN 13919, *Natural stone test methods - Determination of resistance to ageing by SO₂ action in the presence of humidity*

prEN 13373, *Natural stone test methods – Determination of geometric characteristics*

prEN 14066, *Natural stones test methods - Determination of resistance to ageing by thermal shock*

prEN 14147, *Natural stone test methods - Determination of resistance to ageing by salt mist*

prEN 14157, *Natural stone test methods - Determination of the abrasion resistance*

prEN 14158, *Natural stone test methods - Determination of rupture energy*

prEN 14205, *Natural stone test methods - Determination of Knoop hardness*

prEN 14231, *Natural stone test methods - Determination of the slip resistance by means of the pendulum tester*

prEN 14579, *Natural stone test methods - Determination of sound speed propagation*

prEN 14580, *Natural stone test methods - Determination of static elastic modulus*
