

Thermal insulating products for building applications — Determination of the apparent density

The European Standard EN 1602 : 1996 has the status of a
British Standard

ICS 91.100.99; 91.120.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee B/540, Energy performance of materials, components and buildings, to Subcommittee B/540/1, European Standards for thermal insulation, upon which the following bodies were represented:

- Association of Building Component Manufacturers
- Association for the Conservation of Energy
- Association of Lightweight Aggregate Manufacturers
- Autoclaved Aerated Concrete Products Association
- Brick Development Association
- British Rigid Urethane Foam Manufacturers' Association
- British Vermiculite Association
- Building Employers' Confederation
- Chartered Institution of Building Services Engineers
- Concrete Block Association
- Cork Industry Federation
- Department of the Environment (Building Research Establishment)
- Department of the Environment (Construction Directorate)
- Department of Trade and Industry (National Physical Laboratory)
- Eurisol (UK Mineral Wool Association)
- European Phenolic Foam Association
- Glass and Glazing Federation
- Meteorological Office
- National House-building Council
- Thermal Insulation Contractors' Association
- Thermal Insulation Manufacturers' and Suppliers' Association (TIMSA)
- Wood Wool Slab Manufacturers' Association

This British Standard, having been prepared under the direction of the Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 15 June 1997

National foreword

This British Standard has been prepared by Subcommittee B/540/1, European Standards for thermal insulation, and is the English language version of EN 1602 : 1996 *Thermal insulating products for building applications — Determination of the apparent density*, published by the European Committee for Standardization (CEN).

EN 1602 was produced as a result of international discussion in which the United Kingdom took an active part.

This British Standard is one of several general test methods for thermal insulating products for building applications, the EN versions of which are being prepared in CEN/TC 88. This British Standard will be implemented in the United Kingdom, and all conflicting national standards or Parts of standards withdrawn, when the complete series of standards comprising test methods and product specifications has been published.
