National foreword

This British Standard is the UK implementation of EN 16247-5:2015.

This standard is part of the BS EN 16247 series of standards on energy audits. This particular standard, on the competence of energy auditors, is a European standard which relates directly to and uses the terminology of BS EN 16247-1:2012, *Energy audits*.

A UK-specific document also exists: PAS 51215:2014, *Energy efficiency assessment. Competence of a lead energy assessor. Specification*. The requirements contained in PAS 51215:2014 specifically relate to the competences required of 'lead assessors' acting under the Energy Savings Opportunity Scheme introduced by DECC in 2014 and, in the opinion of the UK Committee, are more detailed.

The UK participation in its preparation was entrusted by Technical Committee SEM/1, Energy Management, to Subcommittee SEM/1/1, Energy Management Systems and Energy Audits.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
