

Plastics piping systems for non-pressure drainage and sewerage — Glass-reinforced thermosetting plastics (GRP) based on unsaturated polyester resin (UP) —

Part 6: Practices for installation

The European Standard EN 1636-6:1997 has the status of a British Standard

ICS 23.040.01

National foreword

This British Standard is the official English language version of EN 1636-6:1997.

The UK participation in its preparation was entrusted by Technical Committee PRI/88, Plastic piping systems, to Subcommittee PRI/88/2, Pressure, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Additional information

The UK committee involved in the preparation of BS EN 1636-6:2001 has raised concerns about the publication of this standard. The UK opposition is largely due to the lack of consideration given to the fundamental product specifications, which in the opinion of the committee renders the standard unusable.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 June 2001

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 10, an inside back cover and a back cover.

Kunststoff-Rohrleitungssysteme für drucklose
Entwässerungs- und Abwasserleitungen —
Glasfaserverstärkte duroplastische Kunststoffe (GFK) auf
der Basis von ungesättigtem Polyesterharz (UP) — Teil 6:
Verfahren zur Verlegung

This European Standard was approved by CEN on 16 August 1997.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EUROPEAN COMMITTEE FOR STANDARDIZATION

EUROPÄISCHES KOMITEE FÜR NORMUNG

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 155, Plastics piping systems and ducting systems, the Secretariat of which is held by NNI.

This standard is part of a System Standard for plastics piping systems, which is a standard for glass-reinforced polyester plastics piping systems for non-pressure drainage and sewerage.

System Standards are based on the results of the work being undertaken in ISO/TC 138, Plastics pipes, fittings and valves for the transport of fluids, which is a Technical Committee of the International Organization for Standardization (ISO). They are supported by separate standards on test methods to which references are made throughout the System Standard.

This standard is a guidance document only. It provides a set of guidelines which is related to that given in prEN 1046.

System Standards are consistent with standards on general functional requirement and on practices for installation.

Annex A, which is informative, gives a bibliography.

EN 1636 consists of the following parts, under the general title, *Plastics piping systems for non-pressure drainage and sewerage — Glass-reinforced thermosetting plastics (GRP) based on unsaturated polyester resin (UP)*:

— *Part 1: General.*

— *Part 2: Pipes with flexible, reduced articulated or rigid joints.*

— *Part 3: Fittings.*

— *Part 5: Fitness for purpose of the joints.*

— *Part 6: Practices for installation (this standard).*

— *Part 7: Assessment of conformity.*

The following diagram indicates the place of this standard within the CEN framework of plastics piping systems.

At the date of publication of this standard, System Standards for piping systems of other plastics materials used for the same application are the following.

NOTE: All listed System Standards are under preparation.
