Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PH/2, Eye protection, upon which the following bodies were represented:

- Association of Consulting Scientists
- British College of Optometrists
- British Foundry Association
- British Glass Manufacturers' Confederation
- British Iron and Steel Producers' Association
- British Plastics Federation
- British Safety Industry Federation
- Castings Technology International
- Department of Trade and Industry
- Electricity Association
- Engineering Equipment and Materials Users' Association
- Federation of Manufacturing Opticians
- Flat Glass Manufacturers' Association
- Health and Safety Executive
- Institution of Gas Engineers
- Institution of Mechanical Engineers
- Institution of Occupational Safety and Health
- Light Metal Founders' Association
- Manufacturing Science Finance
- Ministry of Defence
- National Physical Laboratory
- National Radiological Protection Board
- Safety Equipment Association
- Safety Equipment Distributors' Association
- Trades Union Congress
- Zinc Alloy Die Casters' Association
- Co-opted Member

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 December 1995

Text of EN 168	5

National foreword

This British Standard has been prepared by Technical Committee PII/2 and is the English language version of EN 168 *Personal eye-protection — Non-optical test methods*, published by the European Committee for Standardization (CEN). EN 168 was produced as a result of international discussions in which the United Kingdom took an active part. It is based on ISO 4855:1981 *Personal eye-protectors — Non-optical test methods*.

The scope of this standard includes matters which are given in Appendices A, B and F to N inclusive of BS 2092:1987. It does not include matters which are given in either the specification clauses of BS 2092 or Appendices C, D and E of BS 2092:1987. The specification clauses of BS 2092: 1987, together with the schedule of tests given in Appendix E of BS 2092:1987, are replaced by those given in BS EN 166. The optical test methods given in Appendices C and D of BS 2092:1987 are replaced by those given in BS EN 167.

This British Standard, together with BS EN 166:996¹⁾ and BS EN 167:1995, replaces BS 2092:1987, which will be withdrawn on publication of BS EN 166.

Cross-references

Publication referred to	Corresponding British Standard
EN 165:1996	BS EN 165 <i>Personal eye-protection — Vocabulary</i> ^a
EN 166:1996	BS EN 166 <i>Personal eye-protection — Specifications</i> ^a
EN 167:1995	BS EN 167 <i>Personal eye-protection — Optical test methods</i> ^a

^a In preparation.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 20, an inside back cover and a back cover. This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

¹⁾ In preparation.

English version

Personal eye-protection — Non-optical test methods

Protection individuelle de l'oeil — Méthodes
d'essais autres qu'optiques

Persönlicher Augenschutz — Nichtoptische
Prüfverfahren

This European Standard was approved by CEN on 1994-05-30. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by the Technical Committee CEN/TC 85, Eye-protection equipment, of which the secretariat is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 1995, and conflicting national standards shall be withdrawn at the latest by November 1995.

This European Standard has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EC Directive(s).

According to the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Contents

	Page		Page
Foreword	2	10.1 Test for non-adherence of molten metals	9
I Scope	5	10.2 Test for area of coverage of face-shields	9
2 Normative references	5	11 Test for resistance to penetration by hot solids	12
3 Test for increased robustness	5	11.1 Apparatus	12
3.1 Unmounted oculars	5	11.2 Procedure	12
3.2 Complete eye-protectors	5	12 Test for protection against droplets and liquid splashes	12
4 Test for minimum robustness	6	12.1 Test for protection against droplets (for goggle type eye-protectors)	12
4.1 Apparatus	6	12.2 Test for protection against liquid splashes (for face-shields)	13
4.2 Procedure	7	13 Test for protection against large dust particles	13
5 Test for stability at elevated temperature	7	13.1 Apparatus	13
5.1 Apparatus	7	13.2 Procedure	13
5.2 Procedure	8	13.3 Evaluation	15
6 Test for resistance to ultraviolet radiation	8	14 Test for protection against gases and fine dust particles	15
6.1 Apparatus	8	14.1 Apparatus	15
6.2 Procedure	8	14.2 Procedure	15
7 Test for resistance to ignition	8	14.3 Evaluation	15
7.1 Apparatus	8	15 Test for resistance to surface damage by fine particles	15
7.2 Procedure	8	15.1 Apparatus	15
8 Test for resistance to corrosion	8	15.2 Samples	16
9 Test for resistance to high-speed particles	8	15.3 Procedure	17
9.1 Apparatus	8	15.4 Evaluation	17
9.2 Procedure	9	16 Test for resistance to fogging of oculars	18
10 Test for protection against molten metals	9	16.1 Apparatus	18
		16.2 Samples	18
		16.3 Procedure and evaluation	18
		17 Head-form	19
		Figure 1 — Holding device for oculars for the increased robustness test	6
