National foreword

This British Standard is the English language version of EN 1762:1997. It supersedes section 2 of BS 4089:1989.

The UK participation in its preparation was entrusted by Technical Committee PRI/66, Rubber and plastics tubing, hoses and hose assemblies, to Subcommittee PRI/66/1, Industrial, chemical and petrochemical applications, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

Hoses and hose assemblies designated as types 1, 2, 3, 4, 5 and 6 in section 2 of BS 4089:1989 are replaced by types D, D-LT, SD and SD-LT in this standard. The requirements for composite hose assemblies in section 3 of BS 4089:1989 are expected to be the scope of a new publication in CEN.

Attention is drawn to Figure A.1, in which dimensions are expressed in millimetres.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.
