National foreword

This British Standard has been prepared under the direction of the Textiles and Clothing Standards Policy Committee. It is the English language version of EN 23758:1993 *Textiles — Care labelling code using symbols*, published by the European Committee for Standardization (CEN), which is identical with ISO 3758:1991 published by the International Organization for Standardization (ISO). This British Standard supersedes BS 2747:1986 which is withdrawn.

The UK committee involved in the preparation of this European Standard considered that a number of informative and advisory details contained in BS 2747:1986 were useful and relevant to the understanding of BS EN 23758:1994. These details have been retained as national annexes to the European Standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
