National foreword

This British Standard has been prepared under the direction of the Iron and Steel Standards Policy Committee and is the English language version of EN 23923-1:1993 *Metallic powders — Determination of apparent density — Part 1: Funnel method*, published by the European Committee for Standardization (CEN). It is identical with ISO 3923-2:1979, prepared by Technical Committee 119, Powder metallurgy, of the International Organization for Standardization (ISO) with the active participation of the UK.

This British Standard supersedes BS 5600-2.2.1:1989, which is withdrawn and from which it differs by the addition of Annex ZA.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
