# **Aerospace series — Washers, lock, with radial serrations in corrosion resisting steel, cadmium plated for flight control rods — Dimensions**

### National foreword

This British Standard is the UK implementation of EN 2596:2006. It supersedes BS EN 2596:1990 which is withdrawn.

The UK Technical Committee draws the attention of the user, to the fact that under normative references, the quality management systems Standard applicable to BS EN 2596, is EN 9133 and not EN 9100, as is the case for all other EN standards for radial serrated lock washers. This error has been identified to CEN but no corrigenda has been issued to date. It is expected to be corrected at the next amendment or revision of the European Standard.

The UK participation in its preparation was entrusted to Technical Committee ACE/12, Aerospace fasteners and fastening systems.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
