

Adhesives — Peel test for a flexible-bonded-to-rigid test specimen assembly —

Part 2: 180° peel

The European Standard EN 28510-2:1993 has the status of a British Standard

UDC 621.792.053:665.93:620.179.4

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Adhesives Standards Policy Committee (ADC/-) to Technical Committee ADC/9, upon which the following bodies were represented:

- British Adhesives and Sealants Association
- British Plastics Federation
- British Railways Board
- Chemical Industries' Association
- EEA (the Association of Electronics, Telecommunications and Business Equipment Industries)
- Ministry of Defence
- PIRA
- SATRA Footwear Technology Centre
- Society of Motor Manufacturers and Traders Ltd.

This British Standard, having been prepared under the direction of the Adhesives Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 31 May 1991

National foreword

This Part of BS 5350 has been prepared under the direction of the Adhesives Standards Policy Committee. It is identical with ISO 8510-2 “*Adhesives — Peel test for a flexible-bonded-to-rigid test specimen assembly — Part 2: 180° peel*” which was based on the 1979 edition of this British Standard. ISO 8510-2 was published by the International Organization for Standardization (ISO) and prepared by Subcommittee 11, Products, of Technical Committee 61, Plastics, with the active participation and approval of the UK. This Part of BS 5350 is one of a series of methods for testing the mechanical properties of adhesively bonded joints, published as separate Parts of group C of BS 5350.

In 1993 the European Committee for Standardization (CEN) accepted ISO 8510-2:1990 as European Standard EN 28510-2:1993. As a consequence of implementing the European Standard this British Standard is renumbered as BS EN 28510-2 and any reference to BS 5350-C11 should be read as a reference to BS EN 28510-2.

The Part of BS 5350 supersedes BS 5350-C11:1979, which is withdrawn.

Cross-references

International standard	Corresponding British Standard
ISO 5725:1986	BS 5497 <i>Precision of test methods</i> Part 1:1987 <i>Guide for the determination of repeatability and reproducibility for a standard test method by inter-laboratory tests</i> (Identical)
ISO 8510-1:1990	BS 5350 <i>Methods of test for adhesives</i> Part C10:1991 <i>90° peel test for a flexible-to-rigid assembly</i> (Identical)

The Technical Committee has reviewed the provisions of ISO 291:1977, to which reference is made in clauses 2 and 6, and ISO 4588:1989, to which reference is made in clause 2 and 5.2, and has decided that they are acceptable for use in conjunction with this standard. Related British Standards to ISO 291 are BS 2782-0:1982 and Method 1004:1977.

ISO/R 527:1966 is referred to only in the bibliography, and, as it is given for information only, does not affect the use of this Part of BS 5350. Related British Standards are BS 2782:Method 320A:1976 to BS 2782:Method 320F:1976 and Method 1003:1977.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
