

Specification for

Dental brazing materials

The European Standard EN 29333:1991 has the status of a
British Standard

Cooperating organizations

The European Committee for Standardization (CEN), under whose supervision this European Standard was prepared, comprises the national standards organizations of the following countries.

Austria	Oesterreichisches Normungsinstitut
Belgium	Institut belge de normalisation
Denmark	Dansk Standardiseringsraad
Finland	Suomen Standardisoimislitto, r.y.
France	Association française de normalisation
Germany	Deutsches Institut für Normung e.V.
Greece	Hellenic Organization for Standardization
Iceland	Technological Institute of Iceland
Ireland	National Standards Authority of Ireland
Italy	Ente Nazionale Italiano di Unificazione
Luxembourg	Inspection du Travail et des Mines
Netherlands	Nederlands Normalisatie-instituut
Norway	Norges Standardiseringsforbund
Portugal	Instituto Português da Qualidade
Spain	Asociación Española de Normalización y Certificación
Sweden	Standardiseringskommissionen i Sverige
Switzerland	Association suisse de normalisation
United Kingdom	British Standards Institution

This British Standard was published under the authority of the Standards Board and comes into effect on 28 February 1992

National foreword

This British Standard has been prepared under the direction of the Health Care Standards Policy Committee and is the English language version of EN 29333 “*Dental brazing materials*”, published by the European Committee for Standardization (CEN) which endorses ISO 9333:1990 “*Dental brazing materials*”, prepared within Technical Committee 106, Dentistry, of the International Organization for Standardization (ISO) with the active participation of the UK.

An introduction is included in ISO 9333 which reads as follows:

Specific qualitative and quantitative requirements for freedom from biological hazard are not included in this International Standard but it is recommended that in assessing possible biological or toxicological hazards, reference should be made to ISO/TR 7405:1984, “*Biological evaluation of dental materials*”.

There is no British Standard corresponding to ISO/TR 7405 to which reference is made in the “Introduction” and in 4.2 for information only. In the UK it is common practice to assess the biological hazards of dental materials using BS 5828:1989 “*Methods for biological assessment of dental materials*”.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
