National foreword

This British Standard has been prepared by Subcommittee B/518/2 and is the English language version of EN 336:1995 *Structural timber — Coniferous and poplar — Sizes, permissible deviations* published by the European Committee for Standardization (CEN).

The sizes listed in National annex NA are extracted from BS 4471:1987 *Specification for sizes of sawn and processed softwood*, which also lists non-structural sizes. BS 4471 will be withdrawn when a BS EN listing non-structural sizes is published.

No existing British Standard is superseded.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
