Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee B/518, Structural timber, to Subcommittee B/518/1, Test methods, upon which the following bodies were represented:

- Department of the Environment (British Board of Agrément)
- Department of the Environment (Building Research Establishment)
- Institution of Civil Engineers
- Institution of Structural Engineers
- Timber Research and Development Association
- Wood Panel Products Federation
- Coopted members

This British Standard, having been prepared under the direction of the Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 15 November 1995

Text of EN 408	5

National foreword

This British Standard has been prepared by Subcommittee B/518/1 and is the English language version of EN 408:1995 *Timber structures — Structural timber and glued laminated timber — Determination of some physical and mechanical properties* published by the European Committee for Standardization (CEN).

This European Standard supersedes BS 5820:1979.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 13 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

ICS 91.080.20

Descriptors: Timber construction, sawn timber, laminated board, determination, physical properties, mechanical properties, laboratory tests

English version

Timber structures — Structural timber and glued laminated timber — Determination of some physical and mechanical properties

Structures en bois — Bois massif et bois lamellé-collé — Détermination de certaines propriétés physiques et mécaniques

Holzbauwerke — Bauholz für tragende Zwecke und Brettschichtholz — Bestimmung einiger physikalischer und mechanischer Eigenschaften

This European Standard was approved by CEN on 1995-01-09. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by the Technical Committee CEN/TC 124, Timber structures, the secretariat of which is held by DS.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 1995 and conflicting national standards shall be withdrawn at the latest by July 1995.

This standard is one of a series of standards for test methods for building materials and components. It was prepared by a working group under the convenorship of the National Standards Authority of Ireland (NSAI).

NOTE It is considered desirable to maintain the same clause numbers consistently throughout this series of standards. Consequently some clauses are void in this edition of this standard, but it is envisaged that future editions may need to include text in the clauses concerned.

No existing European Standard is superseded.

In accordance with the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom.

Contents

	Page
Foreword	2
Introduction	5
1 Scope	5
2 Normative references	5
3 Symbols	5
4 Determination of dimensions of test pieces	6
5 Determination of moisture content of test pieces	6
6 Determination of density of test pieces	6
7 Conditioning of test pieces	6
8 Determination of modulus of elasticity in bending	6
8.1 Test piece	6
8.2 Procedure	6
8.3 Expression of results	7
9 Determination of shear modulus — Single span method	7
9.1 General	7
9.2 Determination of modulus of elasticity in bending	7
9.3 Determination of apparent modulus of elasticity	8
9.3.1 Test piece	8
9.3.2 Procedure	8
9.3.3 Expression of results	8
9.4 Calculation of shear modulus	9
10 Determination of shear modulus — Variable span method	9
10.1 General	9
10.2 Test piece	9
10.3 Procedure	9
10.4 Expression of results	9
10.4.1 General	9
10.4.2 Apparent modulus of elasticity	9
10.4.3 Shear modulus	9
11 Determination of bending strength	10
11.1 Test piece	10
11.2 Procedure	10
11.3 Expression of results	10
12 Determination of modulus of elasticity in tension parallel to the grain	11
12.1 Test piece	11
12.2 Procedure	11
12.3 Expression of results	11
