National foreword

This British Standard is the English language version of EN 476 : 1997.

The UK participation in its preparation was entrusted by Technical Committee B/505, Wastewater, to Subcommittee B/505/1, General requirements for pipes and fittings, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled 'International Standards Correspondence Index', or by using the 'Find' facility of the BSI Standards Electronic Catalogue.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 12, an inside back cover and a back cover.

Amendments issued since publication

Amd. No.	Date	Text affected

This British Standard, having been prepared under the direction of the Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 15 January 1998

Descriptors: Sanitation, water removal, water flow, sewage, junctions, water pipelines, piping, specifications, performance evaluation, dimensions, tests, marking

English version

General requirements for components used in discharge pipes, drains and sewers for gravity systems

Prescriptions générales pour les composants utilisés
dans les réseaux d'évacuation, de branchement et
d'assainissement, à écoulement libre

Allgemeine Anforderungen an Bauteile für
Abwasserkanäle und -leitungen für
Schwerkraftentwässerungssysteme

This European Standard was approved by CEN on 1997-06-14. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 165, Waste water engineering, the Secretariat of which is held by DIN.

This European Standard provides the basis for the preparation or revision of product standards for discharge pipes, drains and sewers operating as gravity systems (see clause 1 ‘Scope’).

Components meeting the requirements of this European Standard and in permanent or in temporary contact with water intended for human consumption, will not adversely affect the quality of that water. Therefore this standard does not contravene the EC-Council Directives 75/440, 79/869 and 80/778.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 1998, and conflicting national standards shall be withdrawn at the latest by January 1998.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom.

Contents

	Page
Foreword	2
1 Scope	4
2 Normative references	4
3 Definitions, symbols and abbreviations	5
3.1 external diameter OD	5
3.2 factory production control	5
3.3 flexible pipe	5
3.4 gravity system	5
3.5 invert	5
3.6 internal diameter ID	5
3.7 joint	5
3.8 nominal size DN	5
3.9 pipe barrel	5
3.10 proof load	5
3.11 quality control system	5
3.12 rigid pipe	5
3.13 ring stiffness	5
3.14 semi-rigid pipe	5
3.15 surface water	5
3.16 ultimate load	5
4 General functional and dimensional requirements	5
4.1 Dimensions of pipes and fittings	5
4.2 Geometry of pipes	6
4.3 Geometry of fittings	6
4.4 Smoothness of bore	6
4.5 Appearance and soundness	6
4.6 Longitudinal bending moment resistance	6
4.7 Interconnection	7
4.8 Corrosion resistance	7
4.9 Abrasion resistance	7
4.10 Modification	7
4.11 Coatings and linings	7
4.12 Long-term behaviour	7
4.13 Durability	7
4.14 Sealing elements	7

	Page		Page
5 Functional requirements for discharge components inside buildings	7	8 Test methods for discharge components for use inside buildings	9
5.1 General	7	8.1 Watertightness test	9
5.2 Strength of pipes	7	8.2 Elevated temperature cycling test	9
5.3 Watertightness	7	8.3 Airtightness test	10
5.4 Airtightness	7	9 Test methods for components for drains and sewers outside buildings	10
5.5 Temperature	7	9.1 Continuity of invert	10
5.6 Thermal expansion	7	9.2 Crushing/stiffness tests for pipes	10
6 Functional and dimensional requirements for drains and sewers that are generally buried	7	9.3 Crushing/stiffness tests for sections of manholes and shafts	10
6.1 Dimensions of manholes and inspection chambers	7	9.4 Loading test for reducing slabs	10
6.2 Continuity of invert	8	9.5 Loading test for tapers	10
6.3 Load bearing capacity and stiffness	8	9.6 Watertightness tests	10
6.4 Strength of manholes, shafts and inspection chambers above the base unit	8	10 Quality control	11
6.5 Watertightness	8	11 Marking	11
6.6 Temperature	8		
6.7 Dimensional stability	9		
7 General test methods	9		
7.1 Measurement of diameters and wall thicknesses	9		
7.2 Measurement of deviation from straightness of barrels	9		
7.3 Measurement of deviation from squareness of the ends of the pipes	9		
7.4 Longitudinal bending moment resistance test for pipes	9
