National foreword

This British Standard is the UK implementation of EN 50518-2:2010. Following publication of the BS EN 50518 series, BS 5979:2007 will be reviewed.

Additional information

Based on advice received from CENELEC, it is the opinion of the UK national committee that BS EN 50518-1 applies to alarm signals generated from Intruder & Hold-up alarm systems (I&HAS) only. Alarm signals from other types of alarm systems, i.e. fire, social and closed circuit television systems (CCTV) are not within the scope of the BS EN 50518 suite.

British Standard (BS) 5979, *Remote centres receiving signals from fire and security systems – Code of practice*, gives recommendation for the planning, construction and facilities of manned and unmanned remote centres, and for the operation of alarm receiving centres (ARCs) receiving signals from security systems. As a result of the publication of the BS EN 50518 suite, BS 5979 will be reviewed to remove reference to I&HAS.

The UK participation in its preparation was entrusted to Technical Committee GW/1/11, Remote centres.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

This European Standard was approved by CENELEC on 2010-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 79, Alarm systems.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50518-2 on 2010-10-01.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN and CENELEC shall not be held responsible for identifying any or all such patent rights.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2011-10-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2013-10-01

EN 50518 will consist of the following parts, under the generic title “*Monitoring and alarm receiving centre*”:

- Part 1: Requirements for technical facilities;
 - Part 2: Technical requirements;
 - Part 3 ¹⁾: Procedures and requirements for operation.
-

¹⁾ At draft stage.
