National foreword

This British Standard has been prepared by Technical Committee CCM/44, Fire tests for furniture, and is the English language version of EN 597-2:1994 *Furniture — Assessment of the ignitability of mattresses and upholstered bed bases — Part 2: Ignition source: Match flame equivalent*, published by the European Committee for Standardization (CEN). EN 597-2 was produced as a result of discussions within Europe in which the United Kingdom took an active part. BS EN 597-2 supersedes the method of test involving ignition source 1 in BS 6807:1990 which will be revised to reflect this fact. BS 6807:1986 is withdrawn but remains available as it is cited in legislation.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
