

Packaging of winding wires —

Part 2-3: Cylindrical barrelled delivery spools — Specification for non-returnable spools made from thermoplastic material

The European Standard EN 60264-2-3:1994, with the incorporation of amendment A1:2004, has the status of a British Standard

ICS 29.060.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Cables and Insulation Standards Policy Committee (CIL/-) to Technical Committee CIL/55, upon which the following bodies were represented:

- British Cable Makers Confederation
- British Non-ferrous Metals Federation
- British Railways Board
- Covered Conductors Association
- EEA (the Association of Electronics, Telecommunications and Business Equipment Industries)
- Electrical and Electronic Insulation Association
- Electronic Components Industry Federation
- Transmission and Distribution Association (BEAMA Ltd.)

This British Standard, having been prepared under the direction of the Cables and Insulation Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 August 1992

National foreword

This British Standard has been prepared by Technical Committee GEL/55 (formerly CIL/55) and is the English language version of EN 60264-2-3:1994 *Packaging of winding wires — Part 2-3: Cylindrical barrelled delivery spools — Specification for non-returnable spools made from thermoplastic material*, including amendment A1:2004, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 60264-2-3:1990, including amendment 1, published by the International Electrotechnical Commission (IEC).

The start and finish of text introduced or altered by amendment is indicated in the text by tags **A1** **A1**. Tags indicating changes to CENELEC text carry the number of the CENELEC amendment. For example, text altered by CENELEC amendment A1 is indicated by **A1** **A1**.

BS EN 60264, of which there are four Parts, deals with the packaging of winding wires. Part 1 covers containers, Part 2 covers cylindrical barrelled delivery spools, Part 3 covers taper barrelled delivery spools and Part 4 covers methods of test.

This British Standard is one of a series dealing with insulated wires used for windings in electrical equipment, which comprises the following three groups.

IEC 60851, *Methods of test for winding wires*;

IEC 60317, *Specifications for particular types of winding wires*;

IEC 60264, *Packaging of winding wires*.

NOTE BS 6811 *Winding wires* Part 0:1993 *General introduction and list of Parts* lists the various Sections of BS 6811 and BS 7584 against the corresponding Parts of the IEC standards listed above. Some or all of these IEC standards will be adopted as BS ENs in due course and the relevant Parts of BS 6811 and BS 7584 will be renumbered as BS ENs.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 6, an inside back cover and a back cover.
