

Packaging of winding wires —

Part 4-2: Methods of test — Containers made from thermoplastic material for taper barrelled delivery spools

The European Standard EN 60264-4-2:1994, with the incorporation of amendment A1:2004 has the status of a British Standard

ICS 29.060.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Cables and Insulation Standards Policy Committee (CIL/-) to Technical Committee CIL/55, upon which the following bodies were represented:

- British Cable Makers' Confederation
- British Non-ferrous Metals Federation
- British Railways Board
- Covered Conductors Association
- EEA (the Association of Electronics, Telecommunications and Business Equipment Industries)
- Electrical and Electronic Insulation Association
- Electronic Components Industry Federation
- Transmission and Distribution Association (BEAMA Ltd.)

This British Standard, having been prepared under the direction of the Cables and Insulation Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 November 1992

National foreword

This British Standard has been prepared under the direction of the Cables and Insulation Standards Policy Committee. It is identical with IEC 60264-4-2:1992 *Packaging of winding wires — Part 4-2: Methods of test — Containers made from thermoplastic material for taper barrelled delivery spools*, including amendment A1:2004 and Corrigendum March 2005. It is identical with IEC 60264-4-2:1992, including amendment 1:2003 and Corrigendum March 2005, published by the International Electrotechnical Commission (IEC).

The start and finish of text introduced or altered by amendment is indicated in the text by tags **A1** **A1**. Tags indicating changes to IEC text carry the number of the IEC amendment. For example, text altered by IEC amendment 1 is indicated by **A1** **A1**.

In 1994 the European Committee for Electrotechnical Standardization (CENELEC) accepted IEC 60264-4-2:1992 as European Standard EN 60264-4-2:1994. As a consequence of implementing the European Standard this British Standard is renumbered as BS EN 60264-4-2:1995 and any reference to BS 7584-4.2 should be read as a reference to BS EN 60264-4-2.

BS 7584, of which there are four Parts, deals with packaging of winding wires. Part 1 covers containers, Part 2 covers cylindrical barrelled delivery spools, Part 3 covers taper barrelled delivery spools and Part 4 covers methods of test for delivery spools.

The British Standards for winding wires comprise a series which deals with insulated wires used for windings in electrical equipment. The series has three groups comprising:

- a) basic dimensions (BS EN 60182-2);
- b) methods of test (BS 6811-2);
- c) specifications (BS 6811-3 and BS 6811-4).

Cross references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 7 and a back cover.
