

Sound system equipment —

Part 16: Objective rating of speech intelligibility by speech transmission index

The European Standard EN 60268-16:1998 has the status of a
British Standard

ICS 17.140.50; 33.160.20

National foreword

This British Standard is the English language version of EN 60268-16:1998. It is identical with IEC 60268-16:1998. It supersedes BS 6840-16:1989 which will be withdrawn on 2001-01-01.

The UK participation in its preparation was entrusted by Technical Committee EPL/100, Audio, video and multimedia systems and equipment, to Subcommittee EPL/100/3, Equipment and systems in the field of audio, video and audiovisual engineering, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

Attention is drawn to the fact that CEN and CENELEC standards normally include an annex which lists normative references to international publications with their corresponding European publications. The British Standards which implement these international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 20, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Board, was published under the authority of the Standards Board and comes into effect on 15 July 1998

Partie 16: Evaluation objective de
l'intelligibilité de la parole au moyen de
l'indice de transmission de la parole
(CEI 60268-16:1998)

Elektroakustische Geräte
Teil 16: Objektive Bewertung der
Sprachverständlichkeit durch den
Sprachübertragungsindex
(IEC 60268-16:1998)

This European Standard was approved by CENELEC on 1998-04-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 100C/189/FDIS, future edition 2 of IEC 60268-16, prepared by SC 100C, Audio, video and multimedia subsystems and equipment, of IEC TC 100, Audio, video and multimedia systems and equipment, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 60268-16 on 1998-04-01.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 1999-01-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2001-01-01

Endorsement notice

The text of the International Standard IEC 60268-16:1998 was approved by CENELEC as a European Standard without any modification.

	Page
Foreword	2
1 Scope	5
2 Normative references	5
3 Definitions and abbreviations	5
4 Descriptions of the methods	5
4.1 General	5
4.2 The STI method	6
4.2.1 General	6
4.2.2 Precision of the STI method	7
4.2.3 Limitations of the STI method	7
4.3 The STITEL method	7
4.3.1 General	7
4.3.2 Precision of the STITEL method	7
4.3.3 Limitations of the STITEL method	7
4.4 The RASTI method	8
4.4.1 General	8
4.4.2 Precision of the RASTI method	8
4.4.3 Limitations of the RASTI method	8
4.5 Methods of measurement	9
4.5.1 Method of measurement using an acoustic excitation signal	9
4.5.2 Method of measurement using direct (electrical) injection of the test signal	10
4.5.3 Simulation of occupancy noise	10
4.5.4 Intelligibility tests using maximum length sequence (MLS) analysis equipment	10
4.5.5 Simulation of occupancy noise	10
4.5.6 Repetition of measurements	10
4.5.7 Analysis and interpretation of the results	10
5 Other methods of determining intelligibility	11
5.1 Phonetically balanced word scores (256 or 1 000 population)	11
5.2 Modified rhyme tests	11
5.3 Articulation index	11
5.4 Articulation loss of consonants	11
Annex A (normative) Speech transmission index (STI) and revised (STI _r) methods	12
Annex B (informative) The STITEL method	18
Annex C (informative) The RASTI method	19
Annex D (informative) Estimating the correction in the case of strong reflections	20
Annex E (informative) Bibliography	21
