Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee EPL/100, Audio, video and multimedia systems and equipment, to Subcommittee EPL/100/1, Receiving equipment, upon which the following bodies were represented.

- British Broadcasting Corporation
- British Educational Suppliers' Association
- British Radio and Electronic Equipment Manufacturers' Association
- British Telecommunications plc
- Radio, Electrical and Television Retailers' Association
- Radiocommunications Agency

This British Standard, having been prepared under the direction of the Electrotechnical Sector Board, was published under the authority of the Standards Board and comes into effect on 15 March 1997

National foreword

This British Standard has been prepared by Subcommittee EPL/100/1 and is the English language version of EN 60315-9:1996 *Methods of measurement on radio receivers for various classes of emission. Part 9: Measurement of the characteristics relevant to radio data system (RDS) reception*, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 315-9:1996, published by the International Electrotechnical Commission (IEC), and forms Part 9 of a multi-Part standard on measurement methods on radio receivers. Some Parts of this standard appear under the number BS 4054, of the same generic title.

This Part specifies the conditions, characteristics and measurement methods of determining the overall RDS reception characteristics of a sound broadcasting receiver to facilitate comparison of measurements made using various methods. Performance requirements are not specified.

Cross-references

HD 560.1 S1:1990 (IEC 315-1:1988)	BS 4054 <i>Methods of measurement on radio receivers for various classes of emission</i> Part 1:1995 <i>General considerations and methods of measurement, including audio-frequency measurements</i>

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This European Standard was approved by CENELEC on 1996-07-02. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
