

Specifications for particular types of winding wires —

Part 14: Polyvinyl acetal enamelled round aluminium wire, class 105

The European Standard EN 60317-14:1994, with the incorporation of amendment A1:1998 has the status of a British Standard

ICS 29.060.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Cables and Insulation Standards Policy Committee (CIL/-) to Technical Committee CIL/55, upon which the following bodies were represented:

- Covered Conductors Association
- Electrical and Electronic Insulation Association (BEAMA Ltd.)
- Electronic Components Industry Federation
- Transmission and Distribution Association (BEAMA Ltd.)

This British Standard, having been prepared under the direction of the Cables and Insulation Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 April 1993

National foreword

This British Standard has been prepared by Technical Committee GEL/55 (formerly CIL/55) and is the English language version of EN 60317-14 *Specifications for particular types of winding wires — Part 14: Polyvinyl acetal enamelled round aluminium wire, class 105*, including amendment A1:1998, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 60317-14:1990, including amendment 1:1997, published by the International Electrotechnical Commission (IEC).

The introduction to IEC 60317-14 reads as follows.

“This International Standard is one of a series which deals with insulated wires used for windings in electrical equipment. The series has three groups describing:

- 1) methods of test (IEC 851);
- 2) specifications (IEC 317);
- 3) packaging (IEC 264).”

NOTE 1 This Part of BS EN 60317 should be read in conjunction with BS EN 60317-0-3 *General requirements. Enamelled round aluminium wire*.

NOTE 2 Reference should be made to BS 6811-0 *General introduction and list of Parts*, which lists all standards in the BS 6811 series and gives their relationship with IEC publications.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
