

Specifications for particular types of winding wires

**Part 38: Polyester or polyesterimide
overcoated with polyamide-imide
enamelled round copper wire, class 200,
with a bonding layer**

The European Standard EN 60317-38:1994 with the incorporation of
amendments A1:1998 and A2:2000 has the status of a British Standard

ICS 29.060.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Cables and Insulation Standards Policy Committee (CIL/-) to Technical Committee CIL/55, upon which the following bodies were represented:

- Covered Conductors Association
- Electrical and Electronic Insulation Association (BEAMA Ltd.)
- Electronic Components Industry Federation
- Transmission and Distribution Association (BEAMA Ltd.)

This British Standard, having been prepared under the direction of the Cables and Insulation Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 March 1993

National foreword

This British Standard has been prepared by Technical Committee GEL/55 (formerly CIL/55) and is the English language version of EN 60317-38:1994 *Specifications for particular types of winding wires Part 38: Polyester or polyesterimide overcoated with polyamide-imide enamelled round copper wire, class 200, with a bonding layer*, including amendments A1:1998 and A2:2000, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 60317-38:1992, including amendments 1:1997 and 2:1999, published by the International Electrotechnical Commission (IEC).

The introduction to IEC 60317-38 reads as follows.

“This part of IEC 60317 forms an element of a series of standards which deals with insulated wires used for windings in electrical equipment. The series has three groups describing:

- 1) methods of test (IEC 851);
- 2) specifications (IEC 317);
- 3) packaging (IEC 264).”

NOTE 1 This Part of BS EN 60317 should be read in conjunction with BS EN 60317-0-1 *General requirements. Enamelled round copper wire*.

NOTE 2 Reference should be made to BS 6811:Part 0 *General introduction and list of Parts*, which lists all standards in the BS 6811 series and gives their relationships with IEC publications.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, page iv, pages 1 to 4, an inside back cover and a back cover.

The BSI copyright notice displayed throughout this document indicates when the document was last issued.

Sidelining in this document indicates the most recent changes by amendment.
