

Electromechanical components for electronic equipment — Basic testing procedures and measuring methods —

Part 23-3: Test 23c: Shielding effectiveness of connectors and accessories

The European Standard EN 60512-23-3:2001 has the status of a
British Standard

ICS 31.220.01

National foreword

This British Standard is the official English language version of EN 60512-23-3:2001. It is identical with IEC 60512-23-3:2000, including Corrigendum April 2003.

The UK participation in its preparation was entrusted by Technical Committee EPL/48, Electromechanical components for electronic equipment, to Subcommittee EPL/48/2, Connectors for electronic equipment, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this Subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 August 2001

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 13 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This European Standard was approved by CENELEC on 2001-01-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 48B/941/FDIS, future edition 1 of IEC 60512-23-3, prepared by SC 48B, Connectors, of IEC TC 48, Electromechanical components and mechanical structures for electronic equipment, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 60512-23-3 on 2001-01-01.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2001-10-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2004-01-01

Annexes designated "normative" are part of the body of the standard.
In this standard, annex ZA is normative.
Annex ZA has been added by CENELEC.

Endorsement notice

The text of the International Standard IEC 60512-23-3:2000 was approved by CENELEC as a European Standard without any modification.

CONTENTS

Clause	Page
1 Scope and object.....	4
2 Normative references	5
3 Test method	5
3.1 Test requirements	5
3.2 Test screen diameter.....	5
3.3 Applicable frequency range	6
4 Test equipment.....	6
5 Preparation of the test sample under test	7
5.1 Circular connectors	7
5.2 Rectangular connectors.....	8
5.3 Connectors for printed boards	9
5.4 Impedance matching of primary and secondary circuit.....	9
5.5 Preparation of the secondary circuit	9
5.6 Adaptation of the primary circuit	9
5.7 Calibration of test set-up	10
6 Measurement of shielding effectiveness	11
6.1 Measurement	11
6.2 Method of calculating attenuation	11
7 Requirements	12
8 Details to be specified	12
Figure 1 – Principle of line injection method.....	4
