

Operating conditions for industrial-process measurement and control equipment —

Part 3: Mechanical influences

The European Standard EN 60654-3:1997 has the status of a British Standard

ICS 25.040.40

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Industrial-process Measurement and Control Standards Committee (PCL/-) to Technical Committee PCL/1 upon which the following bodies were represented:

- British Gas Corporation
- British Pressure Gauge Manufacturers' Association
- Department of Energy, Gas Standards
- Electricity Supply Industry in England and Wales
- Energy Industries Council
- Engineering Equipment and Materials Users' Association
- Gambica (Beama Ltd.)
- Institution of Gas Engineers
- National Coal Board
- STC Water Regulations and Fittings Scheme

This British Standard, having been prepared under the direction of the Industrial-process Measurement and Control Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 May 1984

National foreword

This British Standard has been prepared by Subcommittee GEL/65/1 (formerly PCL/1) and is the English language version of EN 60654-3:1997. It is identical with IEC 654-3:1983 published by the International Electrotechnical Commission (IEC).

Cross-references

Attention is drawn to the fact that CEN and CENELEC Standards normally include an annex which lists normative references to international publications with their corresponding European publications. The British Standards which implement these international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

English version

Operating conditions for industrial-process measurement and control equipment Part 3: Mechanical influences

(IEC 60654-3:1983)

Conditions de fonctionnement pour les
matériels de mesure et commande dans les
processus industriels
Partie 3: Influences mécaniques
(CEI 60654-3:1983)

Einsatzbedingungen für Meß-, Steuer- und
Regeleinrichtungen in der industriellen
Prozeßtechnik
Teil 3: Mechanische Einflüsse
(IEC 60654-3:1983)

This European Standard was approved by CENELEC on 1997-07-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
