

Optical fibres —

Part 1-54: Measurement methods and test procedures — Gamma irradiation

The European Standard EN 60793-1-54:2003 has the status of a
British Standard

ICS 33.180.10

National foreword

This British Standard is the official English language version of EN 60793-1-54:2003. It is identical with IEC 60793-1-54:2003.

The UK participation in its preparation was entrusted by Technical Committee GEL/86, Fibre optics, to Subcommittee GEL/86/1, Optical fibres and cables, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 25 November 2003

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 13 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This European Standard was approved by CENELEC on 2003-09-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Lithuania, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 86A/852/FDIS, future edition 1 of IEC 60793-1-54, prepared by SC 86A, Fibres et câbles, du CE 86 de la CEI, Fibres optiques, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 60793-1-54 on 2003-09-01.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2004-06-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2006-09-01

Annexes designated "normative" are part of the body of the standard.
In this standard, annex ZA is normative.
Annex ZA has been added by CENELEC.

Endorsement notice

The text of the International Standard IEC 60793-1-54:2003 was approved by CENELEC as a European Standard without any modification.

CONTENTS

INTRODUCTION.....	4
1 Scope.....	5
2 Normative references	5
3 Apparatus.....	6
3.1 Radiation source	6
3.1.1 Testing of environmental background radiation	6
3.1.2 Testing of adverse nuclear environments.....	6
3.2 Light source	6
3.3 Optical filters/monochromators	6
3.4 Cladding mode stripper	6
3.5 Fibre support and positioning apparatus.....	6
3.6 Optical splitter	6
3.7 Input launch simulator	7
3.7.1 Category A1 fibres (graded index multimode fibre)	7
3.7.2 Category B fibres (single-mode fibre)	7
3.7.3 Categories A2.1 and A2.2 (quasi-step and step index fibres)	7
3.8 Detector – Signal detection electronics.....	7
3.9 Optical power meter	7
3.10 Radiation dosimeter	7
3.11 Temperature-controlled container.....	7
3.12 Test reel.....	7
4 Sampling and specimens.....	8
4.1 Specimens	8
4.1.1 Fibre specimen.....	8
4.1.2 Cable specimen.....	8
4.2 Specimen for environmental background radiation test.....	8
4.3 Specimen for testing adverse nuclear environments	8
4.4 Test reel.....	8
4.5 Ambient light shielding	8
5 Procedure	8
5.1 Calibration of radiation source.....	8
5.2 Preparation and conditioning	9
5.3 Attenuation measurement for environmental background radiation	9
5.4 Attenuation measurement for adverse nuclear environment.....	10
6 Calculations	10
6.1 The change in optical attenuation ΔA (environmental background radiation test)	10
6.2 The change in optical transmittance, A (adverse nuclear environmental radiation test)	10
6.3 Normalisation of the results	11
7 Results.....	11
7.1 Information to be provided with each measurement	11
7.2 Information available upon request.....	11
8 Specification information	12
Annex ZA (normative) Normative references to international publications with their corresponding European publications	13
