

Methods of measurement for equipment used in digital microwave radio transmission systems —

**Part 1: Measurements common to
terrestrial radio-relay systems and
satellite earth stations —**

Section 1.4 Transmission performance

The European Standard EN 60835-1-4:1995, together with its amendment A1:1995, has the status of a British Standard

ICS 33.060.30

**BS EN
60835-1-4:1997**

**BS 7573-1.4:
1993**

**IEC 835-1-4:
1992**

*Incorporates
Amendment No. 1 to
BS 7573-1.4:1993
(renumbers BS as
BS EN 60835-1-4:
1997) and
Amendment No. 1 to
BS EN 60835-1-4:
1997*

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Electronic Equipment Standards Policy Committee (EEL/-) to Technical Committee EEL/25, upon which the following bodies were represented:

- British Broadcasting Corporation
- British Radio and Electronic Equipment Manufacturers' Association
- British Telecommunications plc
- Institution of Electrical Engineers
- Radio, Electrical and Television Retailers' Association
- Radiocommunications Agency

The following body was also represented in the drafting of the standard, through subcommittees and panels:

ERA Technology Ltd.

This British Standard, having been prepared under the direction of the Electronic Equipment Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 May 1993

Figure 2 — Definition of timing jitter	8
Figure 3 — Arrangement for the measurement of timing jitter (in accordance with [5])	9
Figure 4 — Examples of frequency responses showing the jitter transfer function (a) and the maximum tolerable input jitter (b), together with limit curve examples for a bit-rate of 34 spacing 368 kbit/s (according to [1])	10
Figure 5 — Arrangement for measuring the response of the radio system to input signal interruptions	10

National foreword

This Section of BS EN 60835 has been prepared by Technical Committee EPL/102 (formerly EEL/25), and is the English language version of EN 60835-1-4:1995, *Methods of measurement for equipment used in digital microwave radio transmission systems — Part 1: Measurements common to terrestrial radio-relay systems and satellite earth stations — Section 4: Transmission performance*, including amendment A1:1995, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 835-1-4:1992, including amendment No. 1:1995, published by the International Electrotechnical Committee (IEC).

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

English version

Methods of measurement for equipment used in digital
microwave radio transmission systems
Part 1: Measurements common to terrestrial radio-relay
systems and satellite earth stations
Section 4: Transmission performance

(including amendment A1:1995)
(IEC 835-1-4:1992 + A1:1995)

Méthodes de mesure applicables au matériel
utilisé pour les systèmes de transmission
numérique en hyperfréquence
Partie 1: Mesures communes aux faisceaux
hertziens terrestres et aux stations terriennes
de télécommunications par satellite
Section 4: Qualité de transmission
(inclut l'amendement A1:1995)
(CEI 835-1-4:1992 + A1:1995)

Meßverfahren für Geräte in digitalen
Mikrowellen-Funkübertragungssystemen
Teil 1: Messungen an terrestrischen
Richtfunksystemen und
Satelliten-Erdfunkstellen
Hauptabschnitt 4: Übertragungsqualität
(enthält Änderung A1:1995)
(IEC 835-1-4:1992 + A1:1995)

This European Standard was approved by CENELEC on 1994-03-08. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
