

Specification for non-impregnated, densified laminated wood for electrical purposes —

Part 2: Methods of test

The European Standard EN 61061-2:2001 has the status of a British Standard

ICS 29.035.99

National foreword

This British Standard is the official English language version of EN 61061-2:2001, including Amendment 1 and Corrigendum. It implements IEC 61061-2:1992 and Amendment 1 without modification.

The UK participation in its preparation was entrusted by Technical Committee GEL/15, Insulating material, to Subcommittee GEL/15/3/6, rigid laminated sheets, tubes and rods for electrical purposes, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 2 April 2002

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 16, an inside back cover and a back cover.

This European Standard was approved by CENELEC on 2001-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of the International Standard IEC 61061-2:1992, prepared by IEC TC 15, Insulating materials, was submitted to the Unique Acceptance Procedure and was approved by CENELEC as EN 61061-2 on 2001-09-25 without any modification.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2002-06-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2004-09-01

Annexes designated "normative" are part of the body of the standard.
In this standard, annex ZA is normative.
Annex ZA has been added by CENELEC.

Endorsement notice

The text of the International Standard IEC 61061-2:2001 was approved by CENELEC as a European Standard without any modification.

INTRODUCTION

This International Standard is one of a series which deals with non-impregnated densified laminated wood for electrical purposes.

The series consists of three parts:

Part 1: Definitions, designation and general requirements (IEC 61061-1).

Part 2: Methods of test (IEC 61061-2).

Part 3: Specifications for individual materials (IEC 61061-3).

This part specifies the method of test.

NOTE The numbering of clauses is the same for non-impregnated densified laminated wood, laminated pressboard and industrial rigid laminated sheets. For this reason, some tests are mentioned but they are not applicable.
