

Specification for

Electrical measuring instruments — X-t recorders —

**Part 2: Recommended additional test
methods**

The European Standard EN 61143-2:1994 has the status of a
British Standard

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Power Electrical Engineering Standards Policy Committee (PEL/-) to Technical Committee PEL/13, upon which the following bodies were represented:

- Association of Consulting Engineers
- Department of Energy (Electricity Division)
- Department of Trade and Industry (National Physical Laboratory)
- Electricity Association
- The Association for the Instrumentation, Control and Automation Industry
GAMBICA (BEAMA Ltd.)
- Institution of Electrical Engineers
- Institution of Incorporated Executive Engineers

This British Standard, having been prepared under the direction of the Power Electrical Engineering Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 March 1993

National foreword

This British Standard has been prepared under the direction of the Power Electrical Engineering Standards Policy Committee. It is identical with IEC 1143-2:1992 *Electrical measuring instruments — X-t recorders — Part 2: Recommended additional test methods* published by the International Electrotechnical Commission (IEC).

In 1994 the European Committee for Electrotechnical Standardization (CENELEC) accepted IEC 1143-2:1992 as European Standard EN 61143-2:1994. As a consequence of implementing the European Standard this British Standard is renumbered as BS EN 61143-2 and any reference to BS 7610-2 should be read as a reference to BS EN 61143-2.
