Cooperating organizations

The European Committee for Electrotechnical Standardization (CENELEC), under whose supervision this European Standard was prepared, comprises the national committees of the following countries:

Austria	Italy
Belgium	Luxembourg
Denmark	Netherlands
Finland	Norway
France	Portugal
Germany	Spain
Greece	Sweden
Iceland	Switzerland
Ireland	United Kingdom

This British Standard, having been prepared under the direction of the Cables and Insulation Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 June 1994

National foreword

This British Standard has been prepared under the direction of the Cables and Insulation Standards Policy Committee and is the English language version of EN 61198:1994 *Mineral insulating oils — Methods for the determination of 2-furfural and related compounds*, published by the European Committee for Electrotechnical Standardization (CENELEC). It is identical with IEC 1198:1993 published by the International Electrotechnical Commission (IEC).

WARNING. This British Standard calls for the use of substances and procedures that may be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 12, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

UDC 621.315.615.2:610.1:543.8

Descriptors: Liquid electrical insulating materials, mineral oils, chemical analysis, determination, furfural, extraction methods, chromatography analysis, high performance liquid, chromatography

English version

Mineral insulating oils — Methods for the determination of 2-furfural and related compounds

(IEC 1198:1993)

Huiles minérales isolantes
Méthodes pour la détermination du 2-furfural
et ses dérivés
(CEI 1198:1993)

Isolieröle auf Mineralölbasis Prüfverfahren zur
Bestimmung von Fur-fural und verwandten
Verbindungen
(IEC 1198:1993)

This European Standard was approved by CENELEC on 1993-12-08. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 10(CO)270, as prepared by IEC Technical Committee 10: Fluids for electrotechnical applications, was submitted to the IEC-CENELEC parallel vote in October 1992.

The reference document was approved by CENELEC as EN 61198 on 8 December 1993.

The following dates were fixed:

- latest date of publication of an identical national standard (dop) 1994-12-01
- latest date of withdrawal of conflicting national standards (dow) 1994-12-01

Annexes designated “normative” are part of the body of the standard. In this standard, Annex A and Annex ZA are normative.

Contents

	Page
Foreword	2
Introduction	3
1 Scope	3
2 Normative references	3
3 Sampling	3
4 Labelling of samples	3
5 Apparatus	3
5.1 General equipment	3
5.2 Equipment for extraction by Method A	3
5.3 Equipment for extraction by Method B	3
5.4 High-performance liquid chromatograph (HPLC)	3
6 Reagents	3
7 Symbols and units	4
8 Analytes	4
9 Operating procedure	4
9.1 Extraction of the analytes	4
9.2 Analysis of the extract	4
10 Calibration	5
10.1 Standard solutions in oil	5
10.2 Standard solution in the chromatographic eluent	5
10.3 Procedure	5
11 Calculations	5
12 Report	5
13 Minimum level of detection	6
14 Precision	6
14.1 Repeatability	6
14.2 Reproducibility	6
Annex A (normative) Checking extraction and recovery	7
Annex ZA (normative) Other international publications quoted in this standard with the references of the relevant European publications	12
Figure 1 — Example of suitable device for extraction with silica cartridge (method B)	8
Figure 2 — Examples of chromatograms recorded at two wavelengths (220 nm and 276 nm)	9
Figure 3 — UV spectra of the 2-furfural derivatives	11
