National foreword

This British Standard is the English language version of EN 61897:1998. It is identical with IEC 61897:1998.

The UK participation in its preparation was entrusted to Technical Committee PEL/11, Overhead lines, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

Attention is drawn to the fact that CEN and CENELEC Standards normally include an annex which lists normative references to international publications with their corresponding European publications. The British Standards which implement these international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 18, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 February 1999

Descriptors: Overhead electrical line, electrical conductor, damping, vibration, requirement, design, quality assurance, classification, test, effectiveness, visual examination, protection against corrosion, non-destructive test, verification of dimension, mechanical test, fatigue test

English version

Overhead lines — Requirements and tests for Stockbridge type aeolian vibration dampers

(IEC 61897:1998)

Lignes aériennes — Exigences et essais applicables aux amortisseurs de vibrations éoliennes Stockbridge
(CEI 61897:1998)

Freileitungen — Anforderungen und Prüfungen für Schwingungsdämpfer Typ Stockbridge
(IEC 61897:1998)

This European Standard was approved by CENELEC on 1998-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 11/140/FDIS, future edition 1 of IEC 61897, prepared by IEC TC 11, Overhead lines, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 61897 on 1998-10-01.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 1999-07-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2001-07-01

Annexes designated “normative” are part of the body of the standard.

Annexes designated “informative” are given for information only.

In this standard, Annex A, Annex C and Annex ZA are normative and Annex B is informative.

Annex ZA has been added by CENELEC.

Endorsement notice

The text of the International Standard IEC 61897:1998 was approved by CENELEC as a European Standard without any modification.

Contents

	Page
Foreword	2
1 Scope	5
2 Normative references	5
3 Definitions	5
4 General requirements	5
4.1 Design	5
4.2 Materials	6
4.3 Mass, dimensions and tolerances	6
4.4 Protection against corrosion	6
4.5 Manufacturing appearance and finish	6
4.6 Marking	6
4.7 Installation instructions	6
5 Quality assurance	6
6 Classification of tests	6
6.1 Type tests	6
6.1.1 General	6
6.1.2 Application	6
6.2 Sample tests	6
6.2.1 General	6
6.2.2 Application	6
6.2.3 Sampling, acceptance criteria	6
6.3 Routine tests	7
6.3.1 General	7
6.3.2 Application and acceptance criteria	7
6.4 Table of tests to be applied	7
7 Test methods	8
7.1 Visual examination	8
7.2 Verification of dimensions, materials and mass	8
7.3 Corrosion protection tests	8
7.3.1 Hot dip galvanized components (other than messenger cable wires)	8
7.3.2 Ferrous components protected from corrosion by methods other than hot dip galvanizing	8
7.3.3 Hot dip galvanized messenger cable wires	8
7.4 Non-destructive tests	8
7.5 Clamp slip test	8
7.6 Breakaway bolt test	9
7.7 Clamp bolt tightening test	9
7.8 Attachment of weights to messenger cable	9
7.9 Attachment of clamp to messenger cable test	9

	Page
7.10 Corona and radio interference voltage (RIV) tests	9
7.11 Damper performance tests	9
7.11.1 Performance test variants	9
7.11.2 Damper characteristic test	10
7.11.3 Damper effectiveness evaluation	11
7.11.3.1 Methods of evaluation	11
7.11.3.2 Laboratory test	11
7.11.3.3 Field test	12
7.11.3.4 Analytical method	12
7.12 Damper fatigue test	12
7.12.1 Test methods	12
7.12.2 Swept frequency method	12
7.12.3 Resonant frequency method	12
7.12.4 Acceptance criteria	13
Annex A (normative) Minimum technical details to be agreed between purchaser and supplier	14
Annex B (informative) Examples of graphs relevant to damper characteristic test	15
Annex C (normative) Wind power input curve	16
Annex ZA (normative) Normative references to international publications with their corresponding European publications	Inside back cover
Bibliography	18
Figure 1 — Test rig for laboratory test of damper effectiveness	13
Figure B.1 — Examples of graphs relevant to damper characteristic test (damper with two resonant frequencies)	15
Figure C.1 — Wind power input curve	16
Table 1 — Tests on dampers	7
Table 2 — Acceptance criteria	10
