National foreword

This British Standard has been prepared by Subcommittee B/540/1, European standards for thermal insulation, and is the English language version of EN 822:1994 *Thermal insulation products for building applications — Determination of length and width*, published by the European Committee for Standardization (CEN).

EN 822 was produced as a result of international discussion in which the United Kingdom took an active part.

This British Standard is one of several general test methods for thermal insulating products for building applications, the EN versions of which are being prepared in CEN/TC 88. This British Standard will be implemented in the United Kingdom, and all conflicting national standards or parts of standards withdrawn, when the complete series of standards comprising test methods and product specifications has been published.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
