Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee CPL/30, Measurement of fluid flow in closed circuits, upon which the following bodies were represented:

- British Compressed Air Society
- British Gas plc
- Department of Energy (Gas and Oil Measurement Branch)
- Department of Trade and Industry (National Engineering Laboratory)
- Electricity Industry in United Kingdom
- Energy Industries Council
- GAMBICA (BEAMA Ltd.)
- Institute of Measurement and Control
- Institute of Petroleum
- Institute of Trading Standards Administration
- Institution of Gas Engineers
- Institution of Mechanical Engineers
- Society of British Gas Industries
- Water Services Association of England and Wales

This British Standard, having been prepared under the direction of the Electrotechnical Sector Board, was published under the authority of the Standards Board and comes into effect on 15 August 1995

Text of EN 835	5

National foreword

This British Standard has been prepared by Technical Committee CPL/30. It is the English language version of EN 835:1994 *Heat cost allocators for the determination of the consumption of room heating radiators — Appliances without an electrical energy supply, based on the evaporation principle*, published by the European Committee for Standardization (CEN).

The foreword of the European Standard makes reference to the date of withdrawal of conflicting national standards. In this case no such national standard exists.

Product certification. Users of this British Standard are advised to consider the desirability of third party certification of product conformity with this British Standard based on testing and continuing surveillance, which may be coupled with assessment of a supplier's quality systems against the appropriate standard in the BS EN ISO 9000 series.

Enquiries as to the availability of the third party certification schemes are forwarded by BSI to the Association of British Certification Bodies. If a third party certification scheme does not already exist, users should consider approaching an appropriate body from the list of Association members.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 16 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

ICS 91.140.10

Descriptors: Metrology, buildings, heating, energy consumption, measuring instruments, temperature measuring instruments, recording apparatus, definitions, equipment, specifications, performance evaluation, installation, inspection

English version

Heat cost allocators for the determination of the consumption of room heating radiators — Appliances without an electrical energy supply, based on the evaporation principle

Répartiteurs de frais de chauffage pour enregistrer les valeurs de consommation de surfaces de corps de chauffe — Appareils sans alimentation en énergie électrique en vertu du principe d'évaporation

Heizkostenverteiler für die Verbrauchswerterfassung von Raumheizflächen — Geräte ohne elektrische Energieversorgung nach dem Verdunstungsprinzip

This European Standard was approved by CEN on 1994-10-14. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official version (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 171, Heat cost allocation, the secretariat of which is held by DIN.

This standard includes two informative Annex A and Annex B. These parts of the standard are not binding.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 1995, and conflicting national standards shall be withdrawn at the latest by April 1995.

According to the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom.

Contents

	Page
Foreword	2
1 Introduction	5
2 Scope and general terms	5
3 Functional principle	5
4 Definitions	6
4.1 Reference condition	6
4.2 Reference temperature of the measuring liquid	6
4.3 Design flow and return temperatures, mean design heating medium temperature, design temperature of the measuring liquid	6
4.4 Displayed reading	6
4.5 Rated displayed reading	6
4.6 Nominal evaporation	6
4.7 Evaporation rate	6
4.8 Counting rate	7
4.9 Meter characteristic	7
4.10 Counting ratio	7
4.11 Consumption scale	7
4.12 Unit scale	7
4.13 Idle evaporation	7
4.14 Measuring period	7
4.15 <i>c</i> -value	7
4.16 Rating factors	8
4.17 Manufacturer	8
5 Requirements for heat cost allocators	8
5.1 Casing	8
5.2 Ampoule	8
5.3 Measuring liquid	8
5.4 Over-fill for idle evaporation	8
5.5 Sealing	9
5.6 Scale system	9
5.7 Consumption scale	9
5.8 Unit scale	9
6 Requirements for use and installation	9
6.1 Temperature limits	9
6.2 Installation on the radiator	10
6.3 Installation position	10
6.4 Conformity of instruments	11
6.5 Requirements for installation in single pipe systems	11
7 Requirements for rating	11
7.1 Resulting rating factor <i>K</i>	11

	Page
7.2 Rating factor K_Q	11
7.3 Rating factor K_C	11
7.4 c -value	11
7.5 Rating factor K_T	11
8 Requirements for maintenance and reading	12
9 Testing	12
9.1 General	12
9.2 Test documents	13
9.3 Test report	13
9.4 Test protocols	13
10 Test procedures	13
10.1 Construction	13
10.2 Sealing	13
10.3 Thermal durability	13
10.4 Ampoule	13
10.5 Measuring liquid purity and risk to health	13
10.6 Measuring liquid meter characteristics and hygroscopicity	13
10.7 Upper temperature limit	13
10.8 Measuring liquid over-fill for idle evaporation	13
10.9 Scale system	14
10.10 c -value, test procedure	14
10.11 c -value, test range	14
10.12 Rating factor K_Q	14
10.13 Rating factor K_C	14
11 Marking	14
Annex A (informative) Information and recommendations	15
A.1 Heating systems	15
A.2 Recommended field of application	15
A.3 Heat emission not controllable by the consumer	15
A.4 Additional corrections	15
Annex B (informative) Bibliography	16
Figure 1 — Design of cylindrical ampoules	10
Figure 2 — Scale size factor	12
Table A.1 — Recommended field of application for heat cost allocators based on the evaporation principle (HKVV) and based on electrical power supply (HKVE)	16
