

Methods of test for ancillary components for masonry —

Part 8: Determination of load capacity and load-deflection characteristics of joist hangers

The European Standard EN 846-8:2000, incorporating amendment A1:2006, has the status of a British Standard

ICS 91.080.30

National foreword

This British Standard is the official English language version of EN 846-8:2000, incorporating amendment A1:2006, which is included in a package of new European Standards being prepared by CEN/TC 125 relating to ancillary components for masonry — ties, straps, hangers and brackets. Although the English language versions of these European Standards will be adopted as British Standards as they become available, the existing British Standards for joist hangers will be retained, but only until such time that the complete package of European Standards becomes available. Any residue(s) from British Standards affected by the package which need to be retained, will be drawn together to form a new BS. The original group of British Standards will then be withdrawn and this will be notified in *Update Standards*.

The UK participation in its preparation was entrusted by Technical Committee B/519, Masonry and associated tests, to Subcommittee B/519/3, Ancillary components.

A list of organizations represented on B/519/3 can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 June 2000

Amendments issued since publication

Amd. No.	Date	Comments
11024 Corrigendum No. 1	July 2000	Error in part title on front cover amended
16753	30 November 2006	Normative references clause updated, Clause 7 modified

English version

**Methods of test for ancillary components for masonry - Part 8:
Determination of load capacity and load-deflection
characteristics of joist hangers**

Méthodes d'essai des composants accessoires de
maçonnerie - Partie 8: Détermination de la résistance et de
la rigidité des étriers supports de poutrelles ou de solives

Prüfverfahren für Ergänzungsbauteile für Mauerwerk -
Teil 8: Bestimmung der Tragfähigkeit und der Last-
Verformungseigenschaften von Balkenauflagern

This European Standard was approved by CEN on 24 December 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 125, Masonry, the Secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2000, and conflicting national standards shall be withdrawn at the latest by September 2000.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Foreword to amendment A1

This document (EN 846-8:2000/A1:2006) has been prepared by Technical Committee CEN/TC 125, Masonry, the secretariat of which is held by BSI.

This Amendment to the European Standard EN 846-8:2000 shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2007, and conflicting national standards shall be withdrawn at the latest by February 2007.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
