Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee TCI/35, Geotextiles, upon which the following bodies were represented:

- Association of Consulting Engineers
- British Geotechnical Society
- British Polyolefin Textiles Association
- British Textile Technology Group
- Chemical Industries Association
- Department of the Environment (Building Research Establishment)
- Department of Transport (Transport Research Laboratory)
- Department of Transport (Highways Agency)
- ERA Technology Ltd.
- Federation of Civil Engineering Contractors
- Institute of Asphalt Technology
- Institute of Wastes Management
- Institution of Chemical Engineers
- Institution of Civil Engineers
- National Rivers Authority
- Society of Engineers Incorporated

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Board, was published under the authority of the Standards Board and comes into effect on 15 August 1996

National foreword

This British Standard has been prepared by Technical Committee TCI/35 and is the English language version of EN ISO 10321:1996 *Geotextiles — Tensile test for joints/seams by wide-width method* published by the European Committee for Standardization (CEN). It is identical with ISO 10321:1992, published by the International Organization for Standardization (ISO).

Cross-references

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

ICS 59.080.70

Descriptors: Textiles, filter fabrics, joints, tests, tension tests, determination, tensile properties

English version

Geotextiles — Tensile test for joints/seams by wide-width method

(ISO 10321:1992)

Géotextiles — Essai de traction pour
joints/coutures par la méthode de la bande large
(ISO 10321:1992)

Geotextilien — Zugversuch am breiten Streifen
an Verbindungen/Nähten
(ISO 10321:1992)

This European Standard was approved by CEN on 1995-12-14. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
