

Gas cylinders — 17E taper thread for connection of valves to gas cylinders —

Part 2: Inspection gauges

The European Standard EN ISO 11116-2:1999 has the status of a British Standard

ICS 21.040.30; 23.060.40

National foreword

This British Standard is the English language version of EN ISO 11116-2:1999. It is identical with ISO 11116-2:1999.

The UK participation in its preparation was entrusted by Technical Committee PVE/3, Gas containers, to Subcommittee PVE/3/1, Valve fittings for gas cylinders, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

Attention is drawn to the fact that CEN and CENELEC Standards normally include an annex which lists normative references to international publications with their corresponding European publications. The British Standards which implement these international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN ISO title page, the EN ISO foreword page, the ISO title page, pages ii to v, a blank page, pages 1 to 14, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 September 1999

English version

Gas cylinders - 17E taper thread for connection of valves to gas cylinders - Part 2: Inspection gauges (ISO 11116-2:1999)

Bouteilles à gaz - Filetage conique 17E pour le raccordement des robinets sur les bouteilles à gaz - Partie 2: Calibres de vérification (ISO 11116-2:1999)

Ortsbewegliche Gasflaschen - Gasflaschen - 17E kegeliges Gewinde zum Anschluß von Ventilen an Gasflaschen - Teil 2: Prüflöhren (ISO 11116-2:1999)

This European Standard was approved by CEN on 16 April 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EUROPEAN COMMITTEE FOR STANDARDIZATION
COMITÉ EUROPÉEN DE NORMALISATION
EUROPÄISCHES KOMITEE FÜR NORMUNG

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

Foreword

The text of the International Standard from Technical Committee ISO/TC 58 "Gas cylinders" of the International Organization for Standardization (ISO) has been taken over as an European Standard by Technical Committee CEN/TC 23 "Transportable gas cylinders", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 1999, and conflicting national standards shall be withdrawn at the latest by December 1999.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 11116-2:1999 has been approved by CEN as a European Standard without any modification.

Gas cylinders — 17E taper thread for connection of valves to gas cylinders — Part 2: Inspection gauges

*Bouteilles à gaz — Filetages coniques 17E pour le raccordement des
robinets sur les bouteilles à gaz —*

Partie 2: Calibres de vérification

Contents	Page
1 Scope	1
2 Terms and definitions	1
3 Requirements	1
3.1 Materials	1
3.2 Thread profile	2
3.3 Thread rotation.....	3
3.4 Taper	3
3.5 Thread profile	3
3.6 Pitch, <i>P</i>	3
4 Gauge dimensions.....	3
5 Inspection gauges	4
5.1 Cylinder neck thread	4
5.2 Valve stem thread	5
5.3 Check gauges.....	7
6 Use of inspection gauges	7
6.1 Plain gauges.....	7
6.2 Threaded gauges	7
6.3 Accept or reject criteria, using plug gauges.....	7
6.4 Accept or reject criteria, using ring gauges.....	7
7 Verification of inspection gauges	10
7.1 General.....	10
7.2 Plug gauges.....	10

7.3 Ring gauges	10
7.4 Use of check gauges	10
8 Identification	10
8.1 Inspection gauges	10
8.2 Check gauges	11
Annex A (informative) Examples of calculation for thread gauge dimensions on the large end diameter.....	12
Annex B (informative) Limitations of gauging system.....	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11116-2 was prepared by Technical Committee ISO/TC 58, *Gas cylinders*, Subcommittee SC2, *Cylinder fittings*.

ISO 11116 consists of the following parts, under the general title *Gas cylinders — 17E taper thread for connection of valves to gas cylinders*:

- *Part 1: Specification*
- *Part 2: Inspection gauges*

Annexes A and B of this part of ISO 11116 are for information only.
