

Preparation of steel substrates before application of paints and related products —

**Group F: Non-metallic blast cleaning
abrasives —**

**Part F1: General introduction and
classification**

The European Standard EN ISO 11126-1:1997 has the status of a
British Standard

ICS 25.220.10; 87.020

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee STI/21, Surface preparation of steel, upon which the following bodies were represented:

- Association of Consulting Engineers
- British Chemical Engineering Contractors Association
- British Coatings Federation Ltd
- British Constructional Steelwork Association Ltd
- British Grit Association
- British Iron and Steel Producers Association
- British Railways Board
- Department of Transport
- Electricity Association
- Institute of Corrosion
- National Federation of Painting and Decorating Contractors
- Oil and Colour Chemists Association
- Paint Research Association
- Royal Society of Chemistry
- Water Services Association of England and Wales

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 June 1997

National foreword

This British Standard has been prepared by Technical Committee STI/21 and is the English language version of EN ISO 11126-1:1997 *Preparation of steel substrates before application of paints and related products — Specifications for non-metallic blast-cleaning abrasives — Part 1: General introduction and classification*, published by the European Committee for Standardization (CEN). It is identical with ISO 11126-1:1993 including the two Technical Corrigenda published in 1997, published by the International Organization for Standardization (ISO). ISO 11126-1 was produced as a result of international discussions in which the United Kingdom took an active part.

This standard supersedes BS 7079-F1:1994, which is withdrawn.

International Standard ISO 11126-1 was prepared by Technical Committee ISO/TC35, Paints and varnishes, Sub-committee SC12, Preparation of steel substrates before application of paints and related products.

Other parts of ISO 11126 are identical with the following parts of BS 7079.

- *Part F3: Specification for copper refinery slag;*
- *Part F4: Specification for coal furnace slag;*
- *Part F5: Specification for nickel refinery slag;*
- *Part F6: Specification for iron furnace slag;*
- *Part F7: Specification for fused aluminium oxide;*
- *Part F8: Specification for olivine sand.*

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, page 2, the ISO title page, page ii, pages 1 and 2, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
