

Corrosion of metals and alloys — Corrosion fatigue testing —

Part 1: Cycles to failure testing

ICS 77.060

National foreword

This British Standard is the UK implementation of EN ISO 11782-1:2008. It is identical with ISO 11782-1:1998. It supersedes BS ISO 11782-1:1998 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee ISE/NFE/8, Corrosion of metals and alloys.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Board and comes into effect on 15 October 1998

Amendments/corrigenda issued since publication

Date	Comments
31 July 2008	This corrigendum renumbers BS ISO 11782-1:1998 as BS EN ISO 11782-1:2008

English Version

Corrosion of metals and alloys - Corrosion fatigue testing - Part 1: Cycles to failure testing (ISO 11782-1:1998)

Corrosion des métaux et alliages - Essais de fatigue-
corrosion - Partie 1: Essais cycliques à la rupture (ISO
11782-1:1998)

Korrosion von Metallen und Legierungen - Prüfung der
Schwingungskorrosion - Teil 1: Prüfung unter Anwendung
von Bruch-Schwingspielen (ISO 11782-1:1998)

This European Standard was approved by CEN on 21 March 2008.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of ISO 11782-1:1998 has been prepared by Technical Committee ISO/TC 156 "Corrosion of metals and alloys" of the International Organization for Standardization (ISO) and has been taken over as EN ISO 11782-1:2008 by Technical Committee CEN/TC 262 "Metallic and other inorganic coatings" the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2008, and conflicting national standards shall be withdrawn at the latest by October 2008.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of ISO 11782-1:1998 has been approved by CEN as a EN ISO 11782-1:2008 without any modification.

Contents

	Page
Introduction	1
1 Scope	1
2 Normative reference	1
3 Definitions	1
4 Test	2
4.1 Principle	2
4.2 Specimens	2
4.3 Environmental considerations	6
4.4 Stressing considerations	7
5 Apparatus	7
6 Procedure	7
7 Test report	8
Annex A (informative) Bibliography	10
Figure 1 — Schematic comparison of $S-N$ behaviour during fatigue and corrosion fatigue for steel	4
Figure 2 — Specimens with tangentially blending fillets between the test section and the ends	5
Figure 3 — Specimens with a continuous radius between ends	5
Figure 4 — Specimens with tangentially blending fillets between the uniform test section and the ends	5
Figure 5 — Specimens with a continuous radius between ends	6

Descriptors: Metal products, metals, alloys, corrosion, corrosion tests, fatigue tests, cyclic tests, breaking.
