

BSI Standards Publication

Thermoplastics piping systems for non-pressure underground drainage and sewerage - Test method for resistance to combined temperature cycling and external loading (ISO 13260:2010)

National foreword

This British Standard is the UK implementation of EN ISO 13260:2011+A1:2017. It is identical to ISO 13260:2010, incorporating amendment 1:2017. It supersedes BS EN ISO 13260:2011, which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags. Tags indicating changes to ISO text carry the number of the ISO amendment. For example, text altered by ISO amendment 1 is indicated by **A1** **A1**.

The UK participation in its preparation was entrusted to Technical Committee PRI/88/1, Plastics piping for non-pressure applications.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 15 June 2010.

Amendments/corrigenda issued since publication

Date	Text affected
31 October 2011	This corrigendum renumbers BS ISO 13260:2010 as BS EN ISO 13260:2011
31 December 2017	Implementation of ISO amendment 1:2017

English Version

Thermoplastics piping systems for non-pressure
underground drainage and sewerage - Test method for
resistance to combined temperature cycling and external
loading (ISO 13260:2011/Amd 1:2017)

Systèmes de canalisations thermoplastiques pour
branchements et collecteurs d'assainissement
enterrés sans pression - Méthode d'essai de la
résistance à un cycle de température et de charge
externe combinés (ISO 13260:2011/Amd 1:2017)

Kunststoff-Rohrleitungssysteme aus
Thermoplasten für erdverlegte Abwasserkanäle
und -leitungen - Prüfverfahren zur
Bestimmung der Widerstandsfähigkeit gegen
Temperaturwechsel und gleichzeitige äußere
Belastung (ISO 13260:2011/Amd 1:2017)

This European Standard was approved by CEN on 11 August 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

European foreword

The text of (ISO 13260:2010) has been prepared by Technical Committee ISO/TC 138 “Plastics pipes, fittings and valves for the transport of fluids” of the International Organization for Standardization (ISO) and has been taken over as EN ISO 13260:2011 by Technical Committee CEN/TC 155 “Plastics piping systems and ducting systems” the secretariat of which is held by NEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2012, and conflicting national standards shall be withdrawn at the latest by March 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1437:2002 .

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of ISO 13260:2010 has been approved by CEN as EN ISO 13260:2011 without any modification.

Foreword to amendment 1

This document (EN ISO 13260:2011/A1:2017) has been prepared by Technical Committee ISO/TC 138 “Plastics pipes, fittings and valves for the transport of fluids” in collaboration with Technical Committee CEN/TC 155 “Plastics piping systems and ducting systems” the secretariat of which is held by NEN.

This Amendment to the European Standard EN ISO 13260:2011 shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2018, and conflicting national standards shall be withdrawn at the latest by March 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 13260:2010/Amd 1:2017 has been approved by CEN as EN ISO 13260:2011/A1:2017 without any modification.

3 Principle	1
4 Apparatus	2
5 Test piece	6
6 Conditioning	6
7 Procedure	6
7.1 Test piece embedment and loading.....	6
7.2 Exposure to hot water.....	7
7.2.1 Method A: Temperature cycling — for pipes/fittings with a mean outside diameter $d_{em} \leq 190$ mm.....	7
7.2.2 Method B: Constant hot water — for pipes/fittings with a mean outside diameter $d_{em} < 190$ mm.....	8
7.3 Assessment.....	8
7.3.1 Assessment of initial deflection and leaktightness.....	8
7.3.2 Control of deflection, weld line and cracks.....	9
7.3.3 Alternative deflection measurement.....	9
8 Calculation and expression of results	9
9 Test report	9
Annex A (informative) Recommended requirements	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 13260 was prepared by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, Subcommittee SC 1, *Plastics pipes and fittings for soil, waste and drainage (including land drainage)*.
