

BSI Standards Publication

Safety of machinery – Prevention of unexpected start-up

National foreword

This British Standard is the UK implementation of EN ISO 14118:2018. It is identical to ISO 14118:2017. It supersedes BS EN 1037:1995+A1:2008, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/3, Safeguarding of machinery.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

Safety of machinery - Prevention of unexpected start-up (ISO 14118:2017)

Sécurité des machines - Prévention de la mise en
marche intempestive (ISO 14118:2017)

Sicherheit von Maschinen - Vermeidung von
unerwartetem Anlauf (ISO 14118:2017)

This European Standard was approved by CEN on 7 October 2017.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Ref. No. EN ISO 14118:2018 E

European foreword

This document (EN ISO 14118:2018) has been prepared by Technical Committee ISO/TC 199 “Safety of machinery” in collaboration with Technical Committee CEN/TC 114 “Safety of machinery” the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2018, and conflicting national standards shall be withdrawn at the latest by August 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1037:1995+A1:2008.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 14118:2017 has been approved by CEN as EN ISO 14118:2018 without any modification.

Annex ZA (informative)

Relationship between this International Standard and the essential requirements of Directive 2006/42/EC aimed to be covered

This International Standard has been prepared under a Commission's standardization request M/396 to provide one voluntary means of conforming to essential requirements of Directive 2006/42/EC.

Once this standard is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of this standard given in Table ZA.1 confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding essential requirements of that Directive, and associated EFTA regulations.

Table ZA.1 — Correspondence between this International Standard and Directive 2006/42/EC

Essential Requirements of Directive 2006/42/EC	Clause(s)/subclause(s) of this standard	Remarks/Notes
Within the limits of the scope all relevant essential requirements are covered	All normative clauses	

WARNING 1 — Presumption of conformity stays valid only as long as a reference to this International Standard is maintained in the list published in the Official Journal of the European Union. Users of this standard should consult frequently the latest list published in the Official Journal of the European Union.

WARNING 2 — Other Union legislation may be applicable to the product(s) falling within the scope of this standard.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General measures to prevent unexpected start-up	2
4.1 General.....	2
4.2 Manual measures for isolation and energy dissipation.....	3
4.3 Other means to prevent unexpected (unintended) start-up.....	3
4.4 Signalling and warning (delayed start).....	3
5 Isolation and energy dissipation	3
5.1 Prevention of unexpected start-up upon restoration of any power supplies.....	3
5.2 Devices for isolation from power supplies.....	3
5.3 Locking (securing) devices.....	4
5.4 Devices for stored-energy dissipation or restraint (containment).....	4
5.4.1 General.....	4
5.4.2 Mechanical elements.....	5
5.4.3 Locking or securing facilities for the restraint (containment) devices.....	5
6 Other measures to prevent unexpected start-up	5
6.1 Design strategy.....	5
6.2 Measures to prevent unintended generation of start commands.....	6
6.2.1 Measures to prevent unintended actuation of manual start controls.....	6
6.2.2 Design of safety-related parts of the control system.....	7
6.2.3 Selection and location of power control elements.....	7
6.3 Measures to maintain stop commands.....	7
6.3.1 Principle.....	7
6.3.2 Maintained stop command generated by a stop control device (level A).....	7
6.3.3 Maintained stop command generated by machine control (level B/C).....	8
6.3.4 Mechanical disconnection (level D; see Figure 1).....	8
6.3.5 Moving-part immobilization (level E; see Figure 1).....	8
6.4 Automatic monitoring of the safe state (stopped condition) during a category 2 stop.....	8
7 Design requirements for verification	8
7.1 General.....	8
7.2 Provisions for verifying isolation.....	9
7.3 Provisions for verifying energy dissipation or restraint (containment).....	9
Annex A (informative) Examples of tasks which can require the presence of persons in danger zones	10
