Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PAI/11, Methods of test for paper, board and pulps, upon which the following bodies were represented:

- British Carton Association
- British Fibreboard Packaging Association
- British Printing Industries Federation
- British Textile Confederation
- Envelope Makers' and Manufacturing Stationers' Association
- Her Majesty's Stationery Office
- Institute of Paper Conservation
- Pira International
- Post Office
- The Paper Federation of Great Britain
- University of Manchester Institute of Science and Technology (UMIST)
- Coopted members

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 May 1995

National foreword

This British Standard has been prepared by Technical Committee PAI/11. It is the English language version of EN ISO 1924-2:1995 *Paper and board — Determination of tensile properties — Part 2: Constant rate of elongation method*, published by the European Committee for Standardization (CEN).

It supersedes BS 4415-2:1986, which is withdrawn.

EN ISO 1924-2 was produced as a result of international discussions in which the UK took an active part.

^a In course of revision.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

ICS 85.060

Descriptors: Paper, paperboards, tests, tension tests, determination, tensile properties, tensile strength

English version

Paper and board — Determination of tensile properties — Part 2: Constant rate of elongation method

(ISO 1924-2:1994)

Papier et carton — Détermination des
propriétés de traction —
Partie 2: Méthode à gradient d'allongement
constant
(ISO 1924-2:1994)

Papier und Pappe — Bestimmung von
Eigenschaften bei zugförmiger Belastung —
Teil 2: Verfahren mit konstanter
Dehngeschwindigkeit
(ISO 1924-2:1994)

This European Standard was approved by CEN on 1994-11-14. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
